FYB TECHNOLOGIES / QUALITY ASSURANCE

Role-based Functional QA Report

SuperAdmin, Admin and Member
1 October 2026 | Desktop browser testing

https://dev-jira.fybtech.xyz/projects

3	37	54
Role accounts tested	New role comparison checks	Earlier SuperAdmin checks included

Assessment: further validation required

Core project and issue workflows work in the tested role scenarios. Four confirmed defects remain. This report does not certify every function: destructive actions, account/security changes, some reports and exports, and several communication workflows were not completed.

Contents

1. Test context and role perspectives
2. Capability comparison
3. Confirmed defects and observations
4. All 37 role comparison checks
5. All 54 earlier SuperAdmin checks
6. Retained fixtures and coverage gaps
7. Screenshot evidence

Test context and role perspectives

Target: https://dev-jira.fybtech.xyz. Date: 1 October 2026, Asia/Shanghai. Method: interactive Codex in-app browser, DOM/accessibility observations and screenshots. Desktop only. No source, API, database, load or security penetration testing. Passwords are omitted.

Expected results are inferred from control labels, ordinary application behavior, role hierarchy and consistency between application views. No formal permission specification or acceptance criteria was supplied. An unexpected capability is reported as an observation unless the intended rule is established.

Accounts verified

SUPERADMIN	rafael.pineda@patolomius.com | rafael.pineda | global SuperAdmin / Active
ADMIN	mocekij762@pumpoly.com | moce | global Admin / Active; QARA Project Admin
MEMBER	sabaye4398@pumpoly.com | sabye | global User / Active; QARA Member after fixture setup

Global account role and project role are separate. Admin and Member initially had no projects in the directory. Admin created QARA and automatically became its Project Admin. The supplied Member was added only to this QA project, containing ordinary test data, to allow a fair comparison of project workflows. No global roles were changed.

SuperAdmin point of view

SCOPE	Dashboard showed 80 active projects and global recent activity. QARA settings accessible without project membership.
WORKING	Original 54-check run covered project create/edit/archive/restore, issue/comment/subtask/epic/sprint workflows and navigation. Current run verified cross-role edit and full create-user role options.
PROBLEMS	Administration user metrics remain zero despite populated directory. Gantt defect reproduced previously and under Admin/Member.

Admin point of view

SCOPE	Admin navigation, full account directory, global audit and analytics visible. Project dashboard initially empty until QARA creation.
WORKING	Created project, added Member, created/edited/transitioned/self-assigned issue, created sprint and epic. Actor audit filter returned 21 matching records.
RESTRICTIONS	Self-delete disabled; new-user form excludes SuperAdmin; existing SuperAdmin role dropdown disabled. Other privileged-account changes not submitted.

Member point of view

BEFORE	No projects; zero dashboard metrics; Admin route denied; unrelated project settings redirected. Wiki spaces and one assignment notification visible.
AFTER	QARA visible with role Member. Issue create/edit/transition/self-assignment/watch/subtask passed; project chat became available.
RESTRICTIONS	Project settings hidden/direct route redirected. Sprint creation and management hidden. Project archive denied. Epic creation succeeds; intended policy needs confirmation.

Status meanings: PASS verifies only the stated behavior. Form/load-only passes do not verify submission. FAIL identifies the stated defect, which may be feedback rather than a backend authorization failure. OBSERVATION needs product-policy clarification. BLOCKED identifies an unestablished outcome.

Current 37 checks: 29 pass, 5 fail, 2 observation, 1 blocked. Counts are checks, not distinct defects. Several checks reproduce the same defect. The earlier 54 checks are separately identified and must not be treated as 91 independent full end-to-end workflows.

Observed capability comparison

Function	SuperAdmin	Admin	Member
Project scope	Global projects	Assigned/created	Assigned only
Administration	Available	Available	Direct /admin denied
New-user roles	User/Admin/SuperAdmin*	User/Admin*	Admin unavailable
Create project	Succeeded (QAFYB)	Succeeded (QARA)	Denied; wrong message
Project settings	Global access	Own Project Admin	Hidden; direct redirect
Add project Member	Inspected previously	Succeeded in QARA	Settings unavailable
Create/edit issue	Succeeded	Succeeded	Succeeded in QARA
Status/self-assign	Succeeded	Succeeded	Succeeded
Subtask/watch	Succeeded	Not repeated fully	Succeeded
Create epic	Succeeded	Succeeded	Succeeded; policy open
Create sprint	Succeeded	Succeeded	Hidden
Start/complete sprint	Not executed	Not executed	Management hidden
Archive/restore project	Succeeded (QAFYB)	Not repeated	Denied; enabled control
Board/calendar/backlog	Loaded	Loaded	Loaded
Gantt undated epic	Incorrect date fallback	Same defect	Same display
User metrics	Wrong zero totals	Wrong zero totals	Admin unavailable
Chat/wiki	Read/search only	Wiki read only	Chat/wiki read only

* New-user form inspected only. No user accounts were created or elevated. Backend denial is established only for actions actually submitted; hidden controls alone do not prove server authorization.

Confirmed defects

D01 - Administration user metrics are incorrect

SEVERITY	Medium | Admin and SuperAdmin
REPRODUCE	Open /admin, compare /admin/accounts and /admin/audit-logs.
EXPECTED	Dashboard should show consistent system data or explicit unavailable/error state.
ACTUAL	Dashboard Total Users 0, Active Users 0, no recent users/audits. Directory 253 total, 38 active, 215 inactive, 15 admins. Admin audit page had 4558 records before new fixtures; actor filter returned 21.
CHECKS	A04, S06; prior D01

D02 - Gantt invents dates for an undated epic

SEVERITY	Medium | SuperAdmin, Admin; visible to Member
REPRODUCE	Create epic without start/end dates; open Gantt.
EXPECTED	Show unscheduled or clearly label visualization fallback, rather than actual dates.
ACTUAL	QA Role Epic 20261001, created with blank dates, displayed Oct 1, 2025 to Oct 1, 2027. Earlier SPS epic detail said Not set.
CHECKS	A12, M13; prior D02

D03 - Member project denial uses attachment error

SEVERITY	Medium | Member
REPRODUCE	With no project memberships, Add Project; name QA Role Member 20261001, key QARM, Kanban; submit Create.
EXPECTED	Relevant project-creation denial; controls should reflect permission.
ACTUAL	No project created. Message: You do not have permission to attach files to this issue. No attachment operation was performed.
CHECKS	M02

D04 - Member has enabled project archive control

SEVERITY	Low | Member
REPRODUCE	On QARA project list, click Archive project; confirm QA-only archive.
EXPECTED	Hide/disable forbidden archive or explain permission before confirmation.
ACTUAL	Confirmation is offered; submission returns Insufficient project role; QARA remains active. Backend restriction works; defect is misleading UI.
CHECKS	M15

Observations requiring follow-up

O05 - Member can create epics

ACTUAL	Member successfully created QARA-4AD804 while Create Sprint is hidden. No requirements specify whether this difference is intended.
FOLLOW-UP	Confirm permission matrix for epic create/edit/delete and sprint management. Do not label a privilege escalation without policy/backend validation.

O06 - Admin privileged-account controls

ACTUAL	Existing SuperAdmin row exposes Edit/Assign/Delete. Edit disables Role but leaves Name, Email and Active controls editable. No changes submitted.
FOLLOW-UP	Validate intended rules using disposable accounts and an approved security test. Visible controls do not establish backend authorization.

O07 - Administrative scope and availability

ACTUAL	Admin analytics shows global issue counts, while project overview is membership-scoped. System service/resource statuses show Unknown. Wiki lists shared spaces even when user has no projects.
FOLLOW-UP	Document intended scope and availability states. No claim of unauthorized data exposure is established.

O01-O04 - Earlier unresolved observations

COUNTS	Overview appears to exclude subtasks; current QARA directory says 2 issues while issue list/calendar includes 3. Clarify labels/counting rules.
VELOCITY	Earlier empty sprint showed Average Completion Time 3.2 days. Current Admin sprint detail follow-up blocked by browser stall.
SEARCH/EXPORT	Earlier global search produced no visible result; issue export captured no download. Current local issue-key search passed. Export content remains unverified.

SuperAdmin checks - current run

S01 - Login/global scope | PASS

EXPECTED	SuperAdmin should see global projects and administer QA fixture
ACTUAL	Dashboard 80 active projects; QARA settings accessible despite not being its project member.

S02 - Issue key search | PASS

EXPECTED	Key search should restrict results
ACTUAL	QARA-2 search returns just the Member parent issue.

S03 - Cross-project issue edit | PASS

EXPECTED	SuperAdmin can edit QA issue created by Admin
ACTUAL	QARA-1 summary updated with SuperAdmin verified suffix.

S04 - User role verification/create-user form | PASS

EXPECTED	SuperAdmin role choices should exceed Admin choices
ACTUAL	Member account is global User/Active, display sabye. SuperAdmin new-user form offers User/Admin/SuperAdmin versus Admin User/Admin only; not submitted.

S05 - Project configuration tabs | PASS

EXPECTED	All configuration tabs should render
ACTUAL	Story Points, Dependencies, Workflow, Enabled Pages and Project Groups open; no configurations submitted.

S06 - Admin dashboard metrics | FAIL

EXPECTED	Global user totals should match directory
ACTUAL	SuperAdmin dashboard repeats zero users/active users and no recent user/audit data, while directory shows 253/38.

Admin checks - current run

A01 - Login / navigation | PASS

EXPECTED	Authenticate with Admin UI
ACTUAL	moce signed in; Admin present; no assigned projects; dashboard zero

A02 - Account directory / own account | PASS

EXPECTED	Directory usable and self-delete blocked
ACTUAL	253 users / 38 active; moce role Admin; detail read-only; own Delete disabled

A03 - Create-user form | PASS - form only

EXPECTED	Limit assignable roles and block empty submit
ACTUAL	User/Admin options only; no SuperAdmin; empty Create disabled; not submitted

A04 - Administration dashboard and analytics | FAIL

EXPECTED	System totals should agree with the user directory and audit data
ACTUAL	Dashboard shows 0 users and no audits; directory has 253 users and audit logs 4558 records. Analytics global issue counts remain populated.

A05 - Audit log filter | PASS

EXPECTED	Actor filter should restrict visible records
ACTUAL	Actor filter shows 21 records, all attributed to mocekij762@pumpoly.com.

A06 - Create Scrum project | PASS

EXPECTED	Admin may create a project and receive Project Admin membership
ACTUAL	QARA created successfully; list shows Project Admin and 0 issues.

A07 - Add project Member | PASS

EXPECTED	Project Admin may add supplied test user as Member to QA-only project
ACTUAL	sabye added to QARA as Member; existing Admin remains Project Admin.

A08 - Create/edit/transition/assign issue | PASS

EXPECTED	Changes should persist and history identify actor
ACTUAL	QARA-1 created; summary updated, High priority, In Progress and assigned moce. History records transitions and assignment.

A09 - Create sprint | PASS

EXPECTED	Sprint should persist as planned
ACTUAL	QA Role Sprint 20261001 saved as planned, 0 issues, capacity 0.

A10 - Create epic | PASS

EXPECTED	Undated epic should persist as Planned
ACTUAL	QA Role Epic 20261001 appears Planned with 0 linked issues.

A11 - Board/calendar/backlog | PASS

EXPECTED	Views should respect sprint and issue dates
ACTUAL	Board empty for selected empty sprint; backlog shows QARA-1; calendar start Oct1/due Oct3.

A12 - Gantt undated epic | FAIL

EXPECTED	Missing dates should remain unset
ACTUAL	Undated QA epic plotted Oct1 2025â€“Oct1 2027.

A13 - SuperAdmin account edit protection | OBSERVATION

EXPECTED	Admin should not change SuperAdmin role
ACTUAL	Role dropdown disabled; Name/Email/Active editable UI; no account changes submitted. Delete/Assign controls enabled, backend restrictions unverified.

A14 - Activity/inbox/wiki/profile | PASS

EXPECTED	Ancillary views should load under Admin
ACTUAL	Activity shows QARA actions including Member events; inbox clear; wiki spaces listed; profile moce and supplied email displayed. No messages or profile edits submitted.

A15 - Sprint detail/report follow-up | BLOCKED

EXPECTED	Sprint detail should remain responsive
ACTUAL	Browser tab stalled when revisiting sprint detail as Admin; clean-tab recovery succeeded. Cannot attribute to app or browser; report/export tests incomplete.

Member checks - current run

M01 - Login / empty dashboard | PASS

EXPECTED	Authenticate and show only scoped data
ACTUAL	Signed in as sabaye4398; all dashboard totals zero; Admin absent

M02 - Project creation permission | FAIL - error feedback

EXPECTED	Allow permitted creation or show relevant denial
ACTUAL	Add Project form visible, but Create denied with unrelated file-attachment permission message

M03 - Direct Admin route | PASS

EXPECTED	Deny non-admin access
ACTUAL	Access denied page shown

M04 - Unrelated project settings | PASS

EXPECTED	Deny non-member access
ACTUAL	QAFYB settings redirected to Dashboard

M05 - Activity / notifications / chat | PASS - load only

EXPECTED	Load scoped pages and explain empty states
ACTUAL	No activity; one assignment notification; chat no-project state; send disabled

M06 - Wiki / profile / logout | PASS - load/logout

EXPECTED	Load UI and end session
ACTUAL	Wiki spaces visible; profile read-only; Logout returned to login

M07 - Assigned project/dashboard | PASS

EXPECTED	Membership should make QA project and its issue metrics visible
ACTUAL	Dashboard now shows 1 active project, 1 In Progress, 1 High Priority. Project role Member.

M08 - Project settings authorization | PASS

EXPECTED	Member should not manage project configuration
ACTUAL	Settings link hidden; direct QARA/settings redirects to dashboard.

M09 - Issue lifecycle/watch | PASS

EXPECTED	Member may create and update issues in assigned project
ACTUAL	QARA-2 created, edited, In Progress, assigned sabye. Watch/unwatch history persisted.

M10 - Create subtask | PASS

EXPECTED	Subtask should be linked to parent
ACTUAL	QARA-3 QA Member subtask appears in QARA-2 details.

M11 - Sprint administration controls | PASS

EXPECTED	Member should view sprint without creation/management controls
ACTUAL	Create Sprint hidden; sprint detail shows read-only dates/state/issues and no start/complete controls.

M12 - Epic access | OBSERVATION

EXPECTED	Member epic permissions should match the product role policy.
ACTUAL	Member successfully created QA Member Epic 20261001 (QARA-4AD804), Planned. This is broader than sprint permissions; intended epic policy was not provided.

M13 - Board/calendar/backlog/Gantt | PASS

EXPECTED	Read views should match scoped QA records
ACTUAL	Empty selected sprint board; 2 parent backlog issues; calendar includes 3 issues/subtask; Gantt renders all 3 plus undated epic fallback. Backlog start/create sprint hidden.

M14 - Project chat | PASS

EXPECTED	Member should access project channel after membership
ACTUAL	QARA general channel visible, 2 members and empty composer; no messages sent.

M15 - Project archive enforcement | FAIL

EXPECTED	Member should not archive project and controls should reflect permission
ACTUAL	Archive control and confirmation visible, submission denied with Insufficient project role. QARA remains active. Backend permission passes; misleading enabled control fails usability.

M16 - Logout | PASS

EXPECTED	Logout should end session
ACTUAL	Login screen displayed after logout.

SuperAdmin checks - earlier 54-check run

These checks were performed earlier on 1 October 2026 using the same SuperAdmin account. They are preserved here in full. They are historical results from that run, not a claim that each operation was repeated for Admin and Member.

T01 - Open Projects while signed out | PASS

EXPECTED	Redirect to login
ACTUAL	`/login` shown

T02 - Empty login fields | PASS

EXPECTED	Sign-in unavailable
ACTUAL	Sign in disabled

T03 - Uncheck Remember me, enter supplied credentials | PASS

EXPECTED	Submit becomes available
ACTUAL	Checkbox unchecked; Sign in enabled

T04 - Sign in | PASS

EXPECTED	Authenticated application opens
ACTUAL	Dashboard loaded

T05 - Dashboard recent-activity Next | PASS

EXPECTED	Different activity page and usable Prev
ACTUAL	Page 2 of 4; entries changed; Prev enabled

T06 - Projects navigation | PASS

EXPECTED	Project directory loads
ACTUAL	Active project rows and controls loaded

T07 - Project search for nonexistent value | PASS

EXPECTED	Clear empty state
ACTUAL	“No projects found.”

T08 - Project search by name/key | PASS

EXPECTED	Matching projects only
ACTUAL	Sample Project Scrum and later QA project found

T09 - Project sorting control | PASS (mode only)

EXPECTED	Sort mode changes
ACTUAL	Newest changed to Name; ordering correctness across the entire directory not asserted

T10 - Empty Create Project submission | INCONCLUSIVE validation

EXPECTED	Required-field feedback or blocked submission
ACTUAL	No creation, but no visible validation message and Name did not expose native required validation

T11 - Create Scrum project QAFYB | PASS

EXPECTED	Persisted project with correct details
ACTUAL	Name, key, summary, Project Admin role, 0 issues visible

T12 - QA project favorite / unfavorite | PASS

EXPECTED	Toggle persists and label changes
ACTUAL	Unfavorite project appeared; original state restored

T13 - Archive QA project | PASS

EXPECTED	Recoverable confirmation; removed from active list
ACTUAL	Confirmation shown; QA project absent from active list, present in Archived

T14 - Restore QA project | PASS

EXPECTED	Returns to active state
ACTUAL	Removed from archived list; settings show Archived: No

T15 - Edit QA project name | PASS

EXPECTED	Saved value persists
ACTUAL	Name changed to “QA Functional Regression 20261001 - verified”

T16 - Open Sample Scrum overview | PASS (load); counts O01

EXPECTED	Overview and navigation load
ACTUAL	Epics, issues, sprints, members, page links loaded

T17 - Issue search `SPS-18` | PASS

EXPECTED	Single matching issue
ACTUAL	One active result, correct key and summary

T18 - Clear issue filters | PASS

EXPECTED	Full list restored
ACTUAL	14 active issues restored before QA additions

T19 - Empty issue creation form | PASS

EXPECTED	Submit disabled without summary
ACTUAL	Create disabled

T20 - Create Task with QA summary | PASS; date defaults require product confirmation

EXPECTED	New task persists
ACTUAL	SPS-19 created with To Do, Medium, Unassigned; dates defaulted to Oct 1-3

T21 - Open QA issue summary | PASS

EXPECTED	Correct issue detail
ACTUAL	Issue-details dialog for SPS-19

T22 - To Do to In Progress / Apply | PASS

EXPECTED	Status persists with history
ACTUAL	In Progress displayed; status and workflow events recorded

T23 - Edit summary and priority | PASS

EXPECTED	Saved values persist
ACTUAL	Edited summary and HIGH priority visible; persisted on reopen

T24 - Assign to me | PASS

EXPECTED	Current account selected and persisted
ACTUAL	rafael.pineda selected; assignment history recorded

T25 - Add issue comment | PASS

EXPECTED	Saved comment, author, timestamp
ACTUAL	QA comment appeared under rafael.pineda

T26 - Watch / Unwatch | PASS

EXPECTED	Toggle and watcher history
ACTUAL	Unwatch appeared; Watch restored; history present

T27 - Bug type filter | PASS

EXPECTED	Only Bug results
ACTUAL	One row, SPS-7, BUG

T28 - Scrum Board load | PASS

EXPECTED	Active sprint issues in status columns
ACTUAL	Two To Do issues in Sample Sprint, other columns empty

T29 - Switch to Swimlanes | PASS (view switch)

EXPECTED	Grouped board view
ACTUAL	Unassigned group with two issues

T30 - Backlog load | PASS (load)

EXPECTED	Sprint/backlog issue sections
ACTUAL	Active/planned sections and QA issue visible

T31 - Create QA sprint in Backlog | PASS

EXPECTED	New planned sprint
ACTUAL	QA Regression Sprint 20261001, planned, 0 issues

T32 - Sprints list/detail | PASS

EXPECTED	Created sprint discoverable
ACTUAL	QA sprint listed and detail opened

T33 - Burndown tab for empty sprint | PASS (empty state only)

EXPECTED	Empty/zero chart values
ACTUAL	Seven days at 0 SP, remaining 0, progress 0%

T34 - Velocity tab | PASS (load); O02

EXPECTED	Report appears
ACTUAL	Type totals 0/0; no completed sprints; questionable 3.2-day metric

T35 - Create QA epic | PASS

EXPECTED	Persisted epic with entered description
ACTUAL	SPS-0FEBD0 created and opened

T36 - Epic Add Issue / Cancel | PASS (open/cancel)

EXPECTED	Form opens and cancellation leaves epic unchanged
ACTUAL	Form opened; cancelled; zero issues at that time

T37 - Gantt load | PASS (load); D02

EXPECTED	Timeline and scheduled issues
ACTUAL	Existing and QA issues loaded with dates

T38 - Calendar Next / Prev | PASS

EXPECTED	October to November to October
ACTUAL	Correct headings; November empty state; QA parent/child visible in October

T39 - Project settings tabs | INSPECTED

EXPECTED	Each configuration section loads
ACTUAL	Details, Story Points, Dependencies, Workflow, Enabled Pages, Groups, Members inspected

T40 - Global Activity filter Oct 1-Oct 1 / Refresh | PASS

EXPECTED	Only selected date's events
ACTUAL	QA events for Oct 1 returned

T41 - Notification Open | PASS

EXPECTED	Correct linked issue opens
ACTUAL	Mention opened FTFYB-3 with matching comment

T42 - Admin Account search | PASS

EXPECTED	Matching account and statistics
ACTUAL	Active SuperAdmin account returned; 253 user total

T43 - Admin analytics | INSPECTED; numerical accuracy not fully validated

EXPECTED	Metrics and project table load
ACTUAL	Type/priority totals and project pagination displayed

T44 - Admin system page | INSPECTED

EXPECTED	Diagnostic status available or explicit unavailable state
ACTUAL	Services and resources report Unknown; maintenance/configuration controls visible

T45 - Audit Logs | PASS (presence only)

EXPECTED	QA changes traceable
ACTUAL	Issue creation/transition/edit/comment/watch and sprint creation records present

T46 - Slack load | PASS (load/empty composer)

EXPECTED	Workspace/channel content and composer
ACTUAL	29Black/general messages visible; Send disabled when empty

T47 - Slack search `paging-smoke` | PASS

EXPECTED	Matching message results
ACTUAL	50 matching results displayed

T48 - Wiki choose Tististeng / open observed page URL | PASS (read only); sidebar selected option mismatched header after direct navigation

EXPECTED	Selected space and page content load
ACTUAL	Page content, version history, attachments/comments sections loaded

T49 - Wiki favorite toggle | PASS

EXPECTED	Toggle reversible
ACTUAL	Starred link appeared, then removed; original state restored

T50 - Settings Profile / Preferences / Account | INSPECTED

EXPECTED	Tabs load with account's available options
ACTUAL	Profile read-only; preference controls visible; account deletion disabled

T51 - Create subtask on QA issue | PASS

EXPECTED	Child persists under parent
ACTUAL	SPS-20 created; parent shows 0 of 1 done and creation history

T52 - Associate QA issue with QA epic | PASS (selected value); inverse epic count not rechecked

EXPECTED	Association persists
ACTUAL	Selected QA Regression Epic 20261001 and updated issue metadata

T53 - Global issue search | INCONCLUSIVE - O03

EXPECTED	Existing issue discoverable
ACTUAL	No visible outcome

T54 - Filtered issue export | INCONCLUSIVE - O04

EXPECTED	Download/file with filtered data
ACTUAL	No captured download

Retained test fixtures

QA objects are retained for reproducibility. No permanent deletion or account change was performed. The Member session was logged out on the recovered tab. A prior browser tab stalled during Admin sprint-detail navigation; that tab/session could not be inspected to confirm logout.

Current role fixture: QARA

PROJECT	QA Role Admin 20261001 | Scrum | active | moce Project Admin; sabye Member. No real project data added or exposed.
ISSUES	QARA-1: QA Admin role lifecycle 20261001 - SuperAdmin verified; In Progress, High, assigned moce. QARA-2: QA Member role lifecycle 20261001 - verified; In Progress, Medium, assigned sabye, unwatched. QARA-3: QA Member subtask 20261001; To Do, under QARA-2.
EPICS	QARA-26778F: QA Role Epic 20261001; Planned, blank dates. QARA-4AD804: QA Member Epic 20261001; Planned, blank dates.
SPRINT	QA Role Sprint 20261001; planned, empty, capacity 0.
DENIED	QARM was not created. Member archive failed, QARA remains active.

Earlier fixtures retained

PROJECT	QAFYB: QA Functional Regression 20261001 - verified; active/restored, unfavorited, Scrum, no issues.
ISSUES	SPS-19: QA Regression 20261001 - edited lifecycle; In Progress, High, assigned rafael.pineda, one QA comment, unwatched, associated QA epic. SPS-20: To Do subtask.
PLANNING	SPS-0FEBD0: QA Regression Epic 20261001; originally undated. QA Regression Sprint 20261001: planned, empty.

Coverage gaps and next steps

This is a functional and role comparison test report, not an all-functions-correct sign-off. User journeys were tested where stated; page loads and form inspection were not substituted for mutation verification.

- Account creation/edit/deactivation/deletion, global role changes, passwords, forgot-password email, lockout/session expiration and Remember me persistence were not submitted or fully validated. Permanent deletion requires a separate approved test.

- Sprint assignment/start/complete, estimates/capacity and complete transition combinations remain unverified. Admin sprint report follow-up was blocked by a browser timeout; clean-tab recovery worked. This is not filed as an app defect.

- Attachments/uploads/download integrity, issue links, comment editing/deletion, issue archive/restore and export contents remain unverified. Kanban-specific workflows, drag/drop and concurrent updates remain untested.

- Project workflow/dependency/story-point/enabled-page/group setting saves were inspected but not submitted. No global roles changed. Existing privileged-account backend protections were not probed.

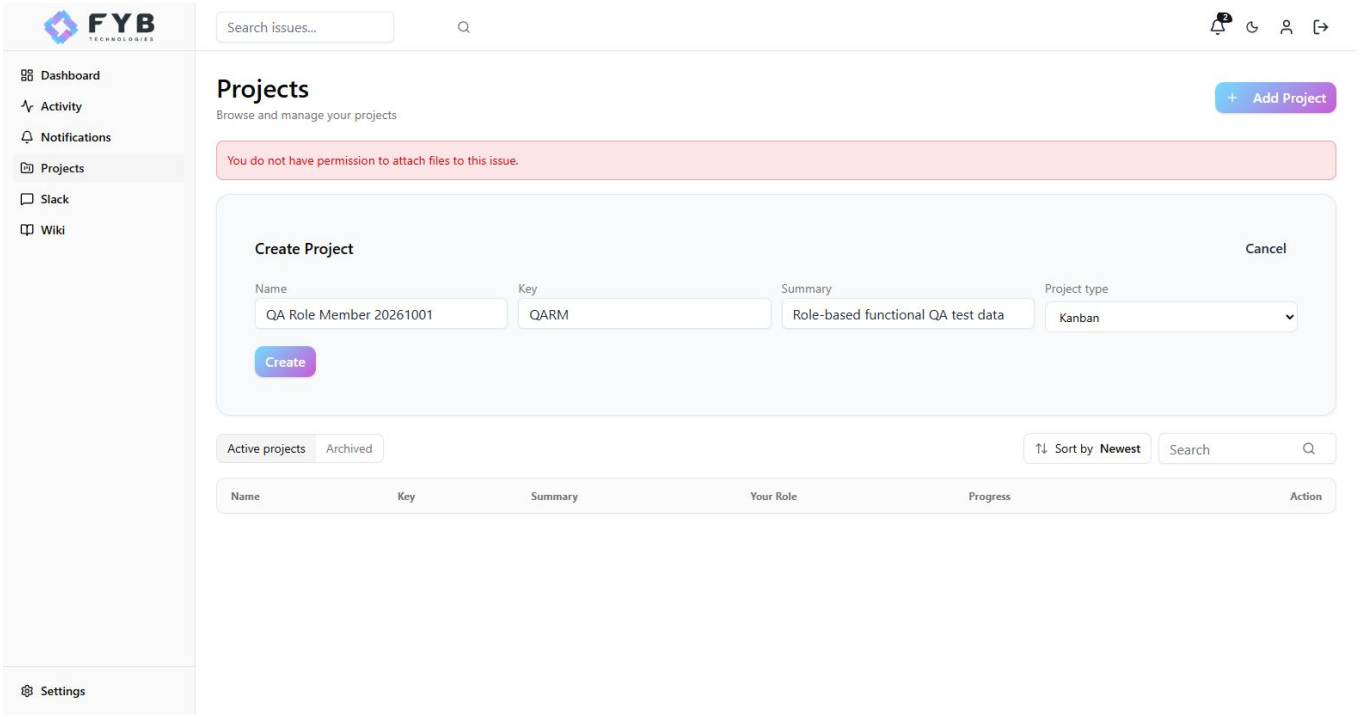

- Chat sending, direct messages/groups, channel changes and notification delivery were not executed. Wiki create/edit/publish/restore/comments/uploads were not executed. Read access alone does not prove all write functions.

- Cross-browser/mobile/responsive layouts, accessibility conformance, timezone edge cases, performance, API authorization and security penetration testing remain outside this run.

Recommended order: fix D01-D04; confirm epic and privileged-account policies; retest unresolved search/export/velocity/count observations in a standard browser; complete remaining workflows with approved disposable fixtures; require persistence and exported-file validation before release sign-off.

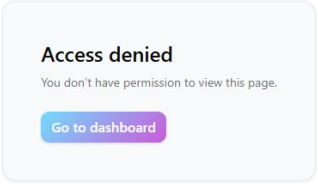

Evidence E01 - Member project creation - D03

Wrong attachment permission message after project submission. Screenshots reflect their capture time; later fixtures/edits may differ.

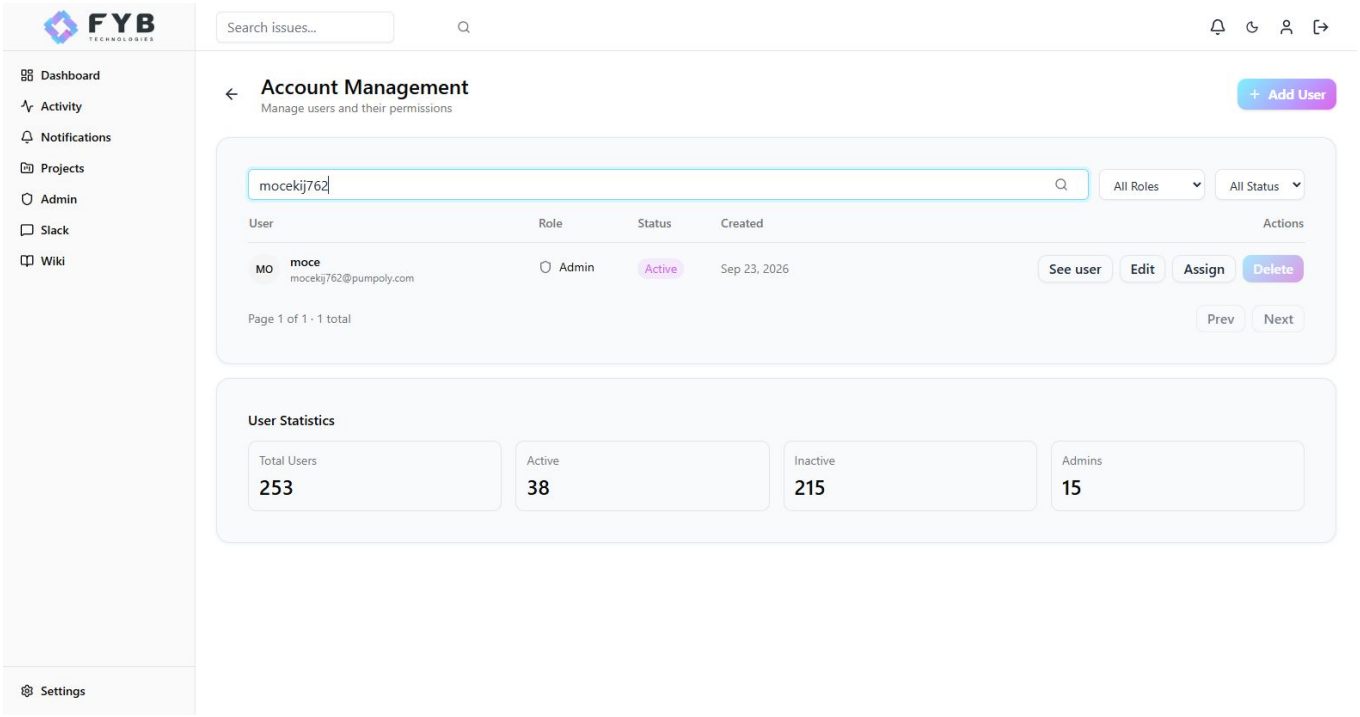

Evidence E02 - Member direct Admin denial

Access denied verifies navigation restriction. Screenshots reflect their capture time; later fixtures/edits may differ.

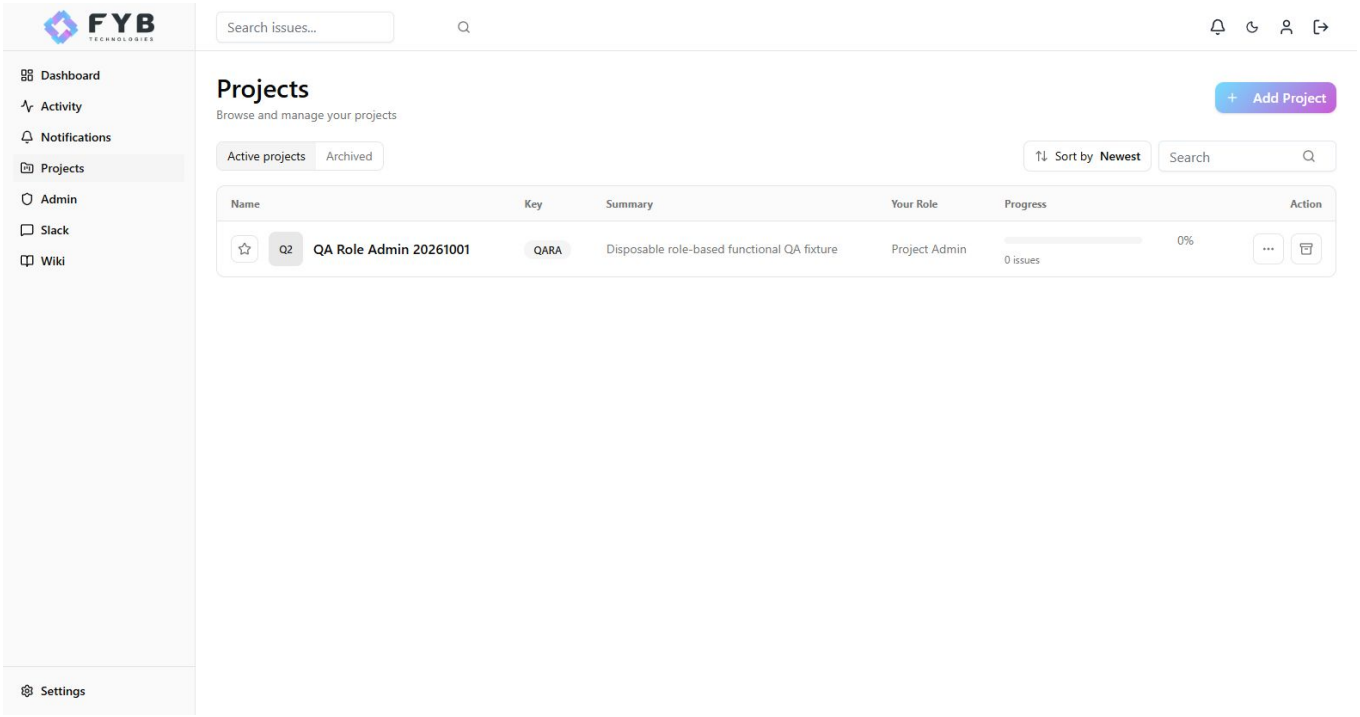

Evidence E03 - Admin account and directory

moce verified as Admin; populated statistics. Screenshots reflect their capture time; later fixtures/edits may differ.

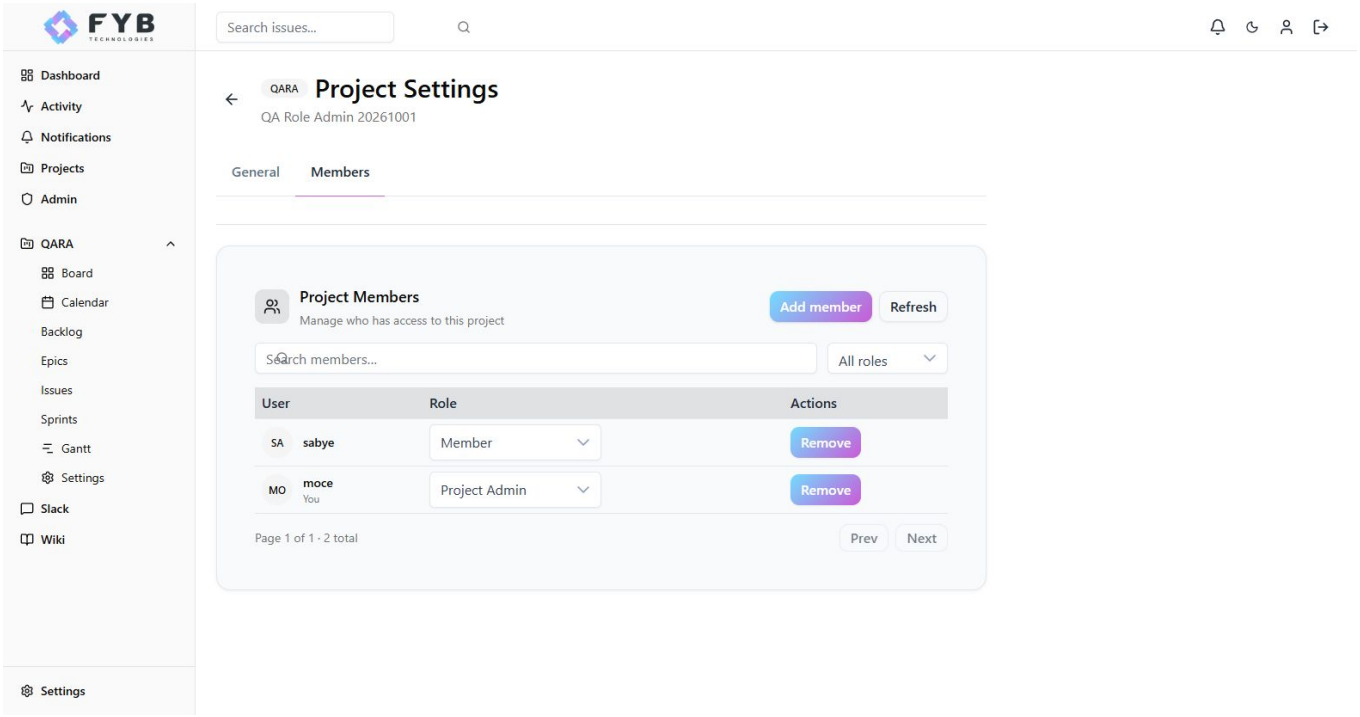

Evidence E04 - Admin project creation

QARA persisted with Project Admin role. Screenshots reflect their capture time; later fixtures/edits may differ.

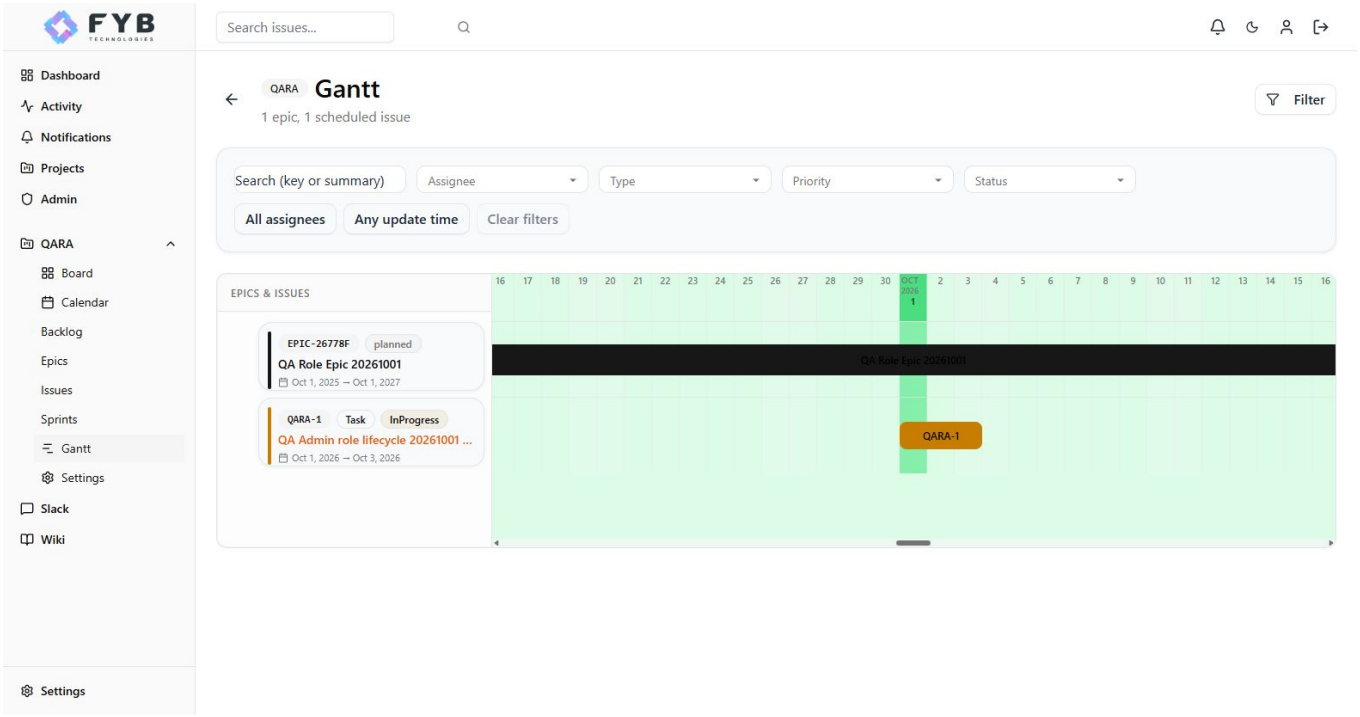

Evidence E05 - QA-only membership

moce Project Admin and sabye Member in the fixture. Screenshots reflect their capture time; later fixtures/edits may differ.

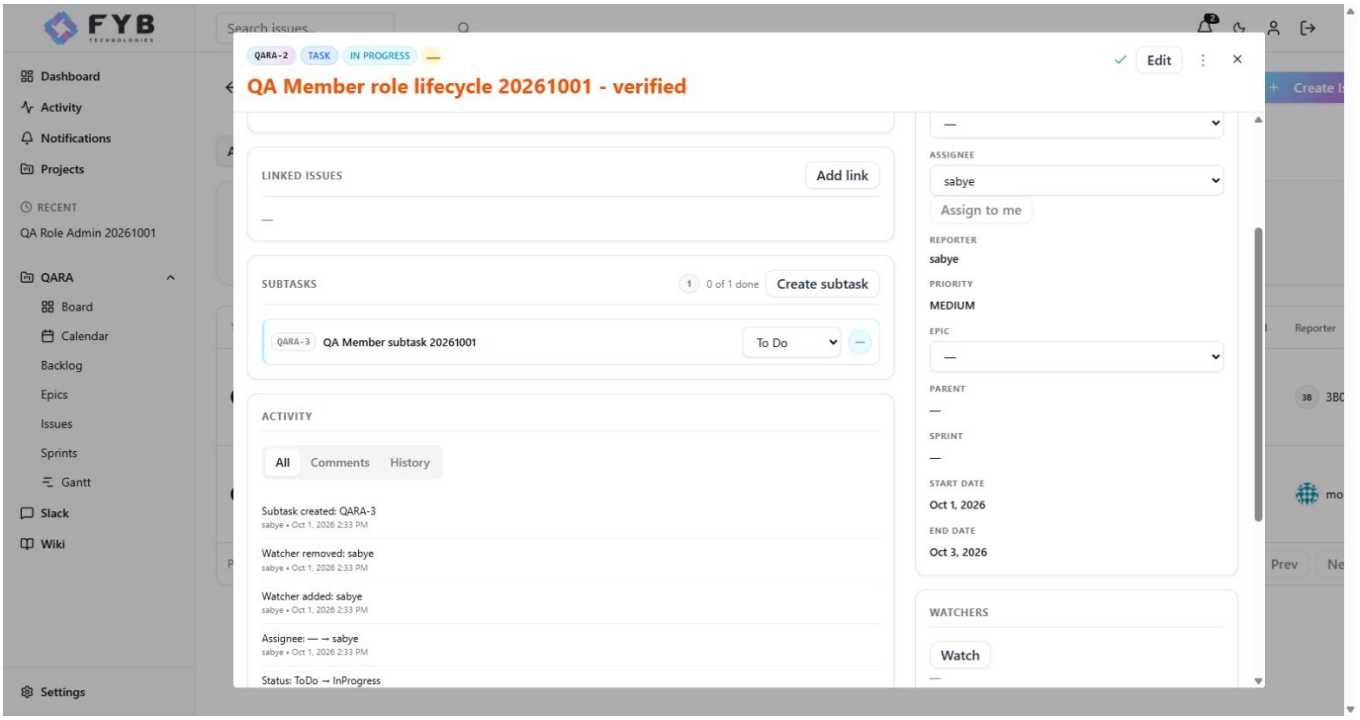

Evidence E06 - Gantt dates - D02

Blank-date epic shown with concrete two-year range. Screenshots reflect their capture time; later fixtures/edits may differ.

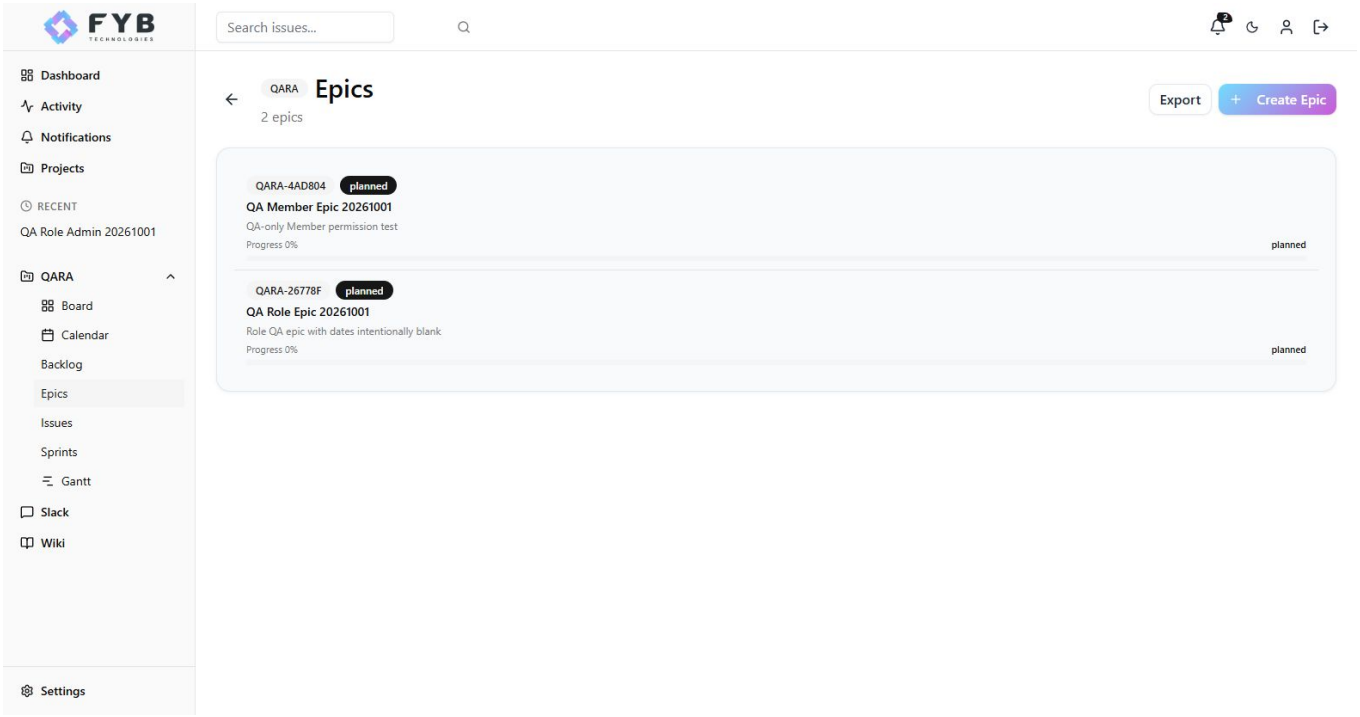

Evidence E07 - Member issue and subtask

QARA-2 persisted; child and history visible. Screenshots reflect their capture time; later fixtures/edits may differ.

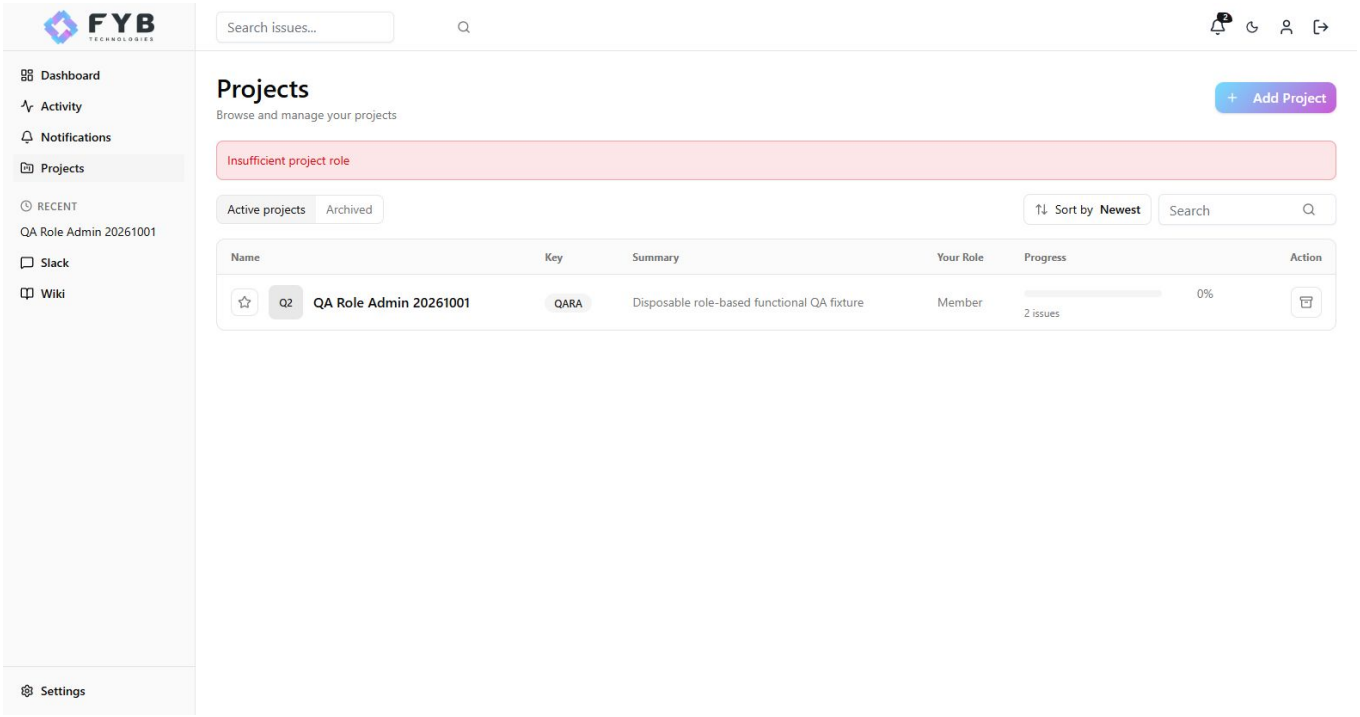

Evidence E08 - Member epic capability - O05

Member-created epic visible alongside Admin epic. Screenshots reflect their capture time; later fixtures/edits may differ.

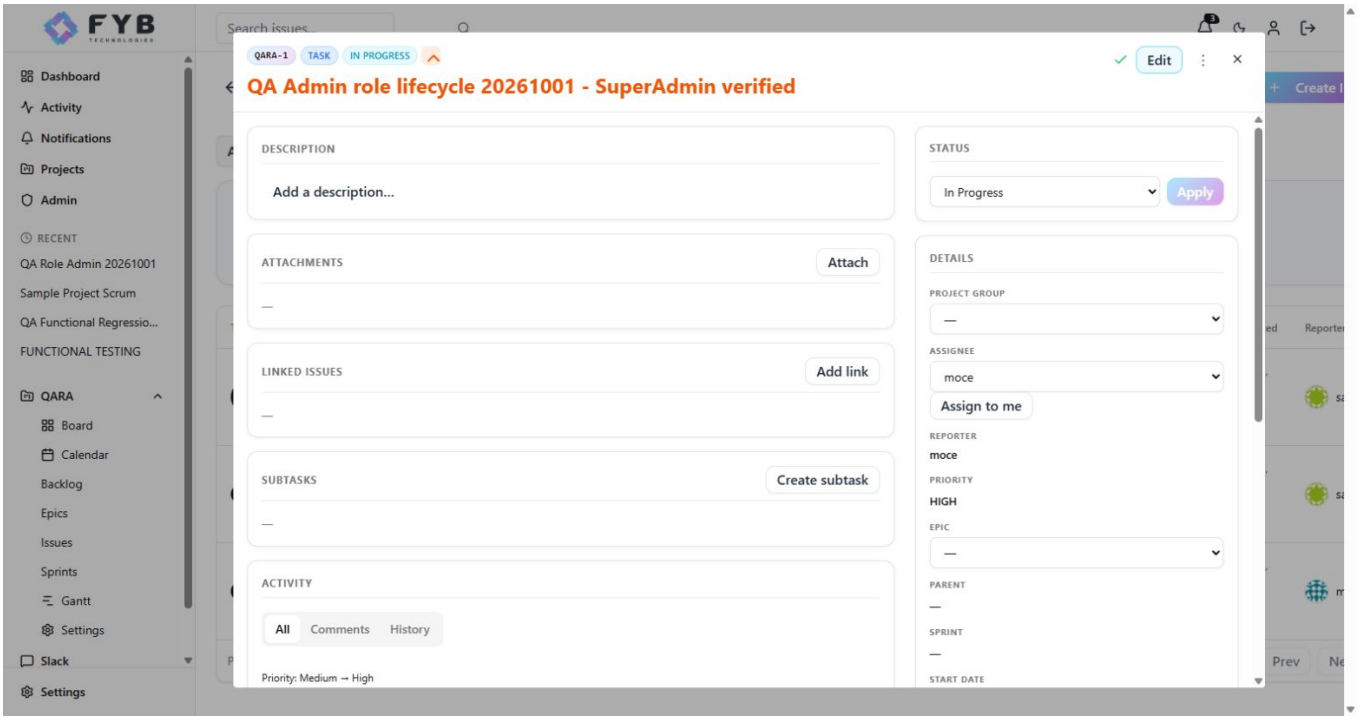

Evidence E09 - Member archive denial - D04

Insufficient project role; project remains active. Screenshots reflect their capture time; later fixtures/edits may differ.

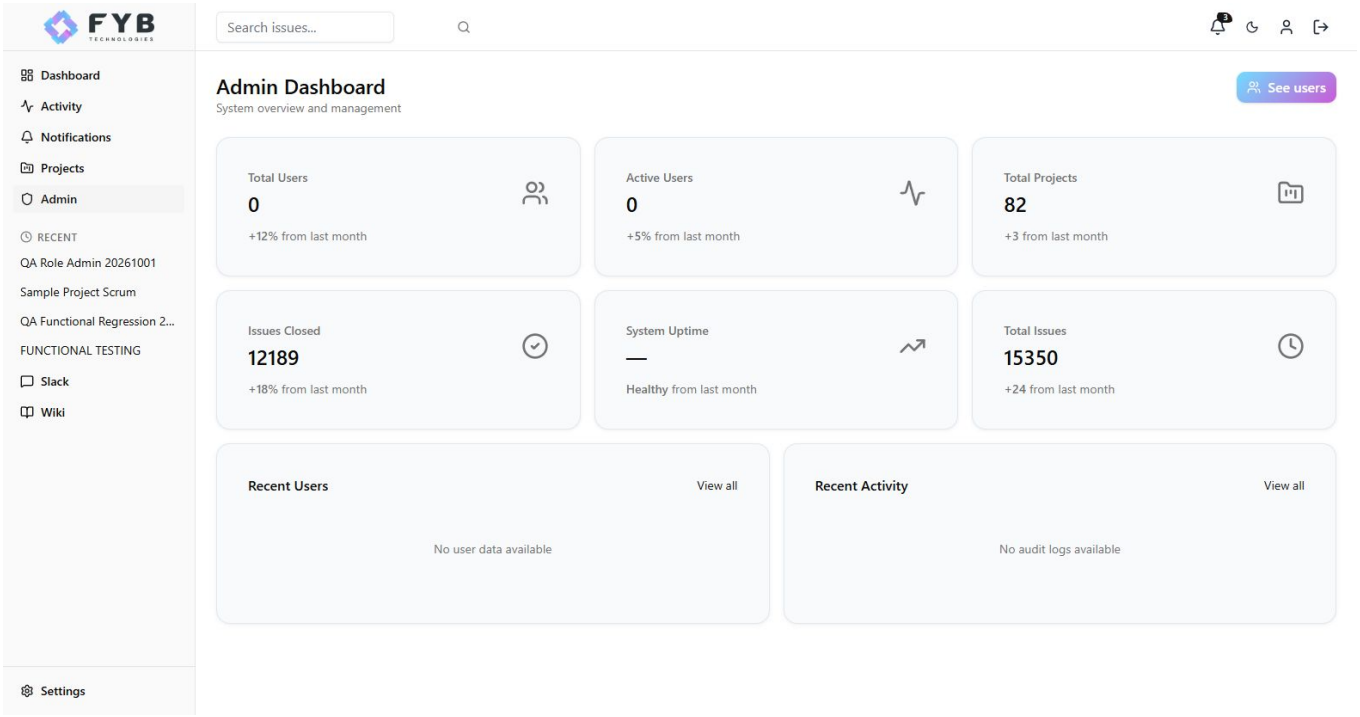

Evidence E10 - SuperAdmin cross-role editing

SuperAdmin updated Admin-created issue. Screenshots reflect their capture time; later fixtures/edits may differ.

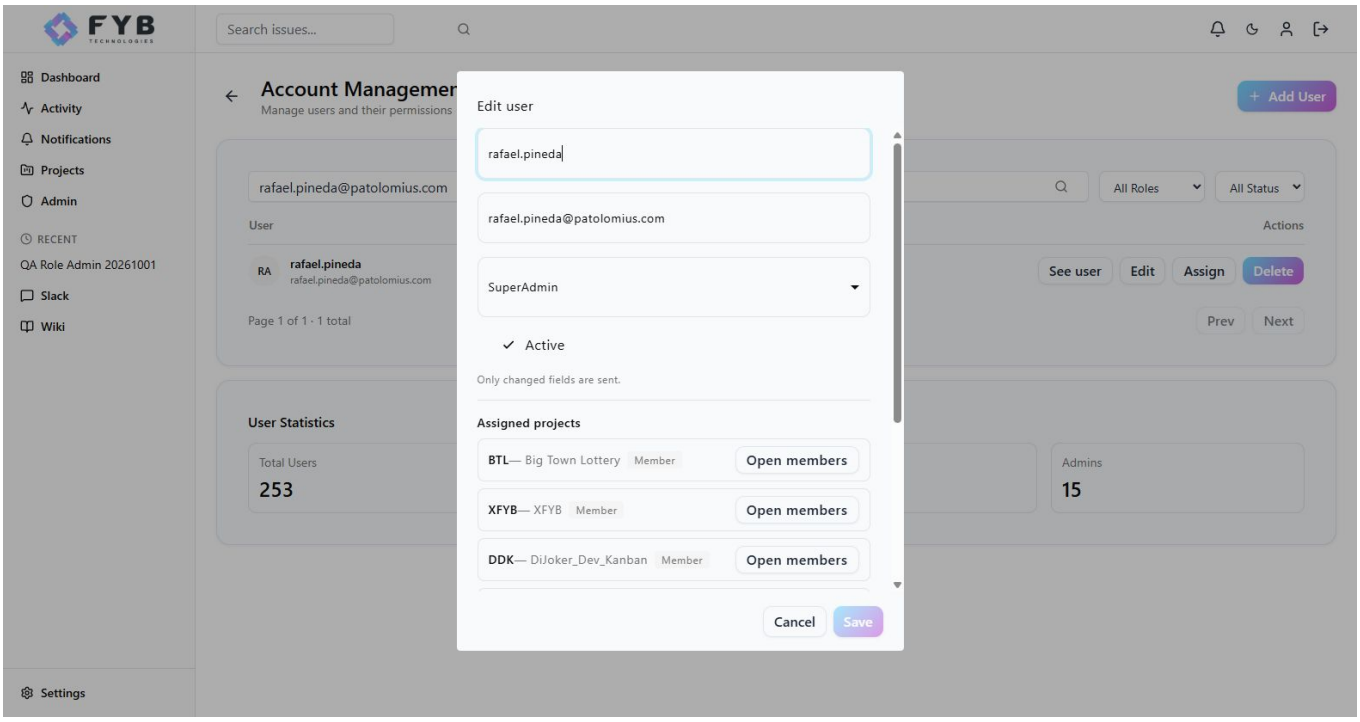

Evidence E11 - SuperAdmin dashboard - D01

Zero user counts and absent recent audit data. Screenshots reflect their capture time; later fixtures/edits may differ.

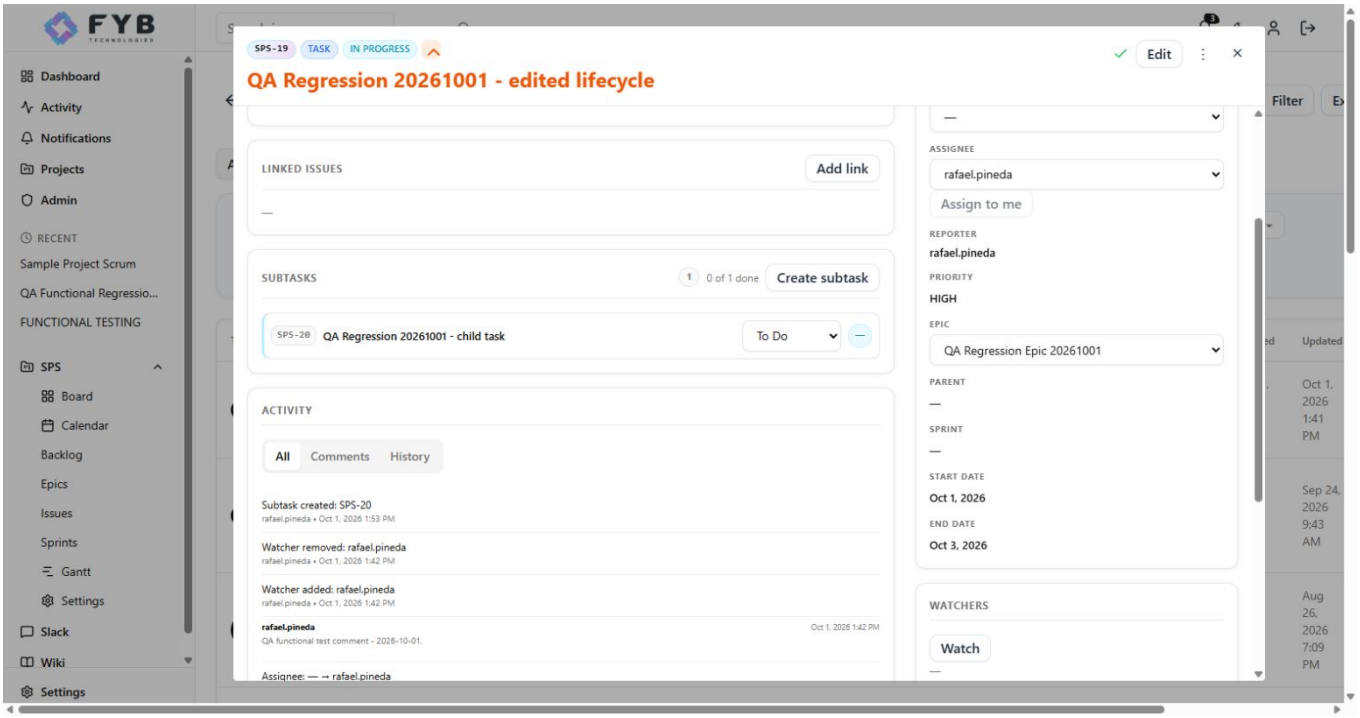

Evidence E12 - Privileged account form - O06

Admin sees SuperAdmin edit form; Role disabled, other changes unsubmitted. Screenshots reflect their capture time; later fixtures/edits may differ.

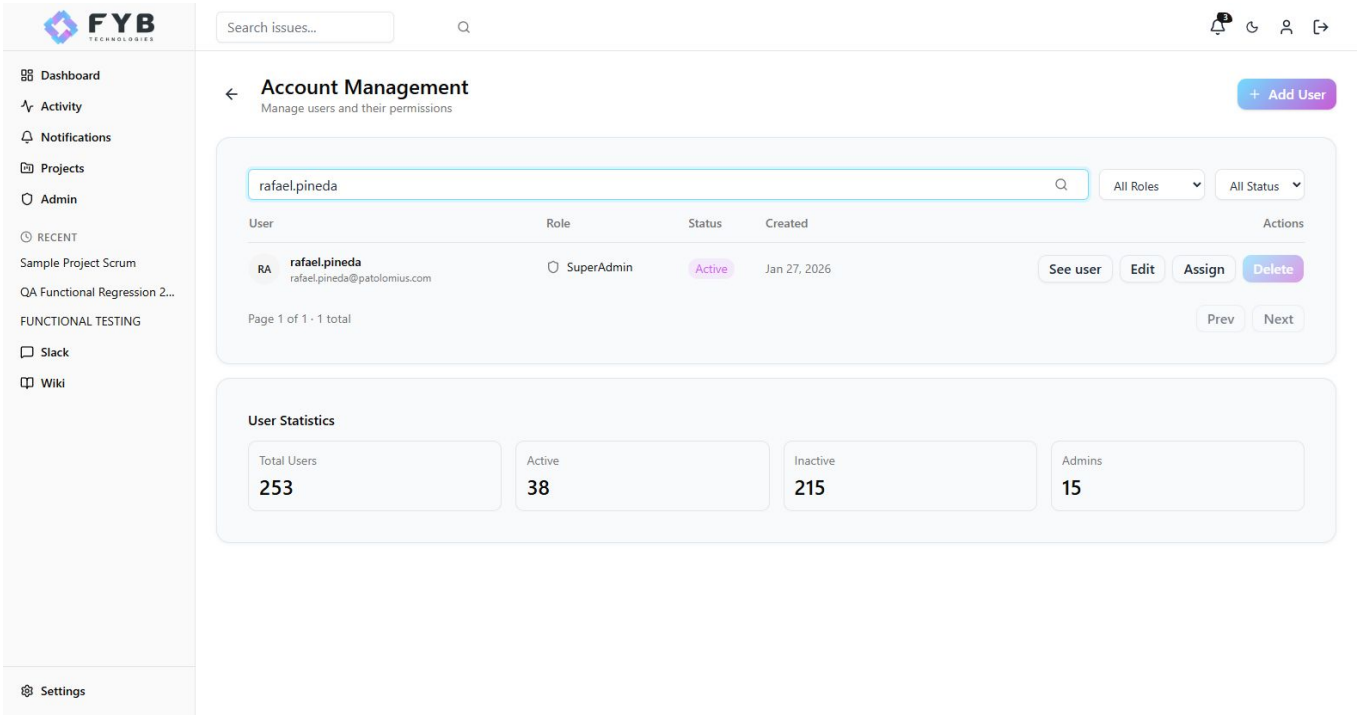

Evidence E13 - Earlier SuperAdmin lifecycle

SPS-19 and QA subtask/comment work. Screenshots reflect their capture time; later fixtures/edits may differ.

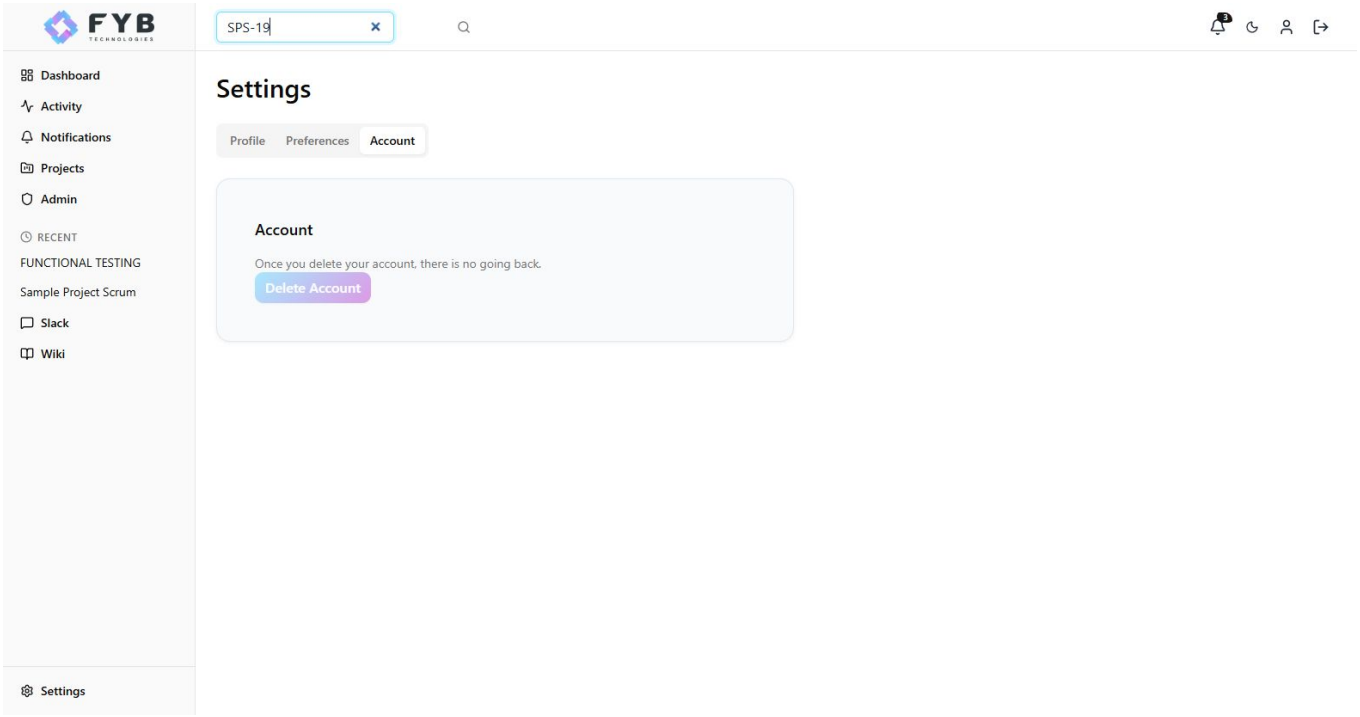

Evidence E14 - Earlier directory comparison - D01

253 total and 38 active users. Screenshots reflect their capture time; later fixtures/edits may differ.

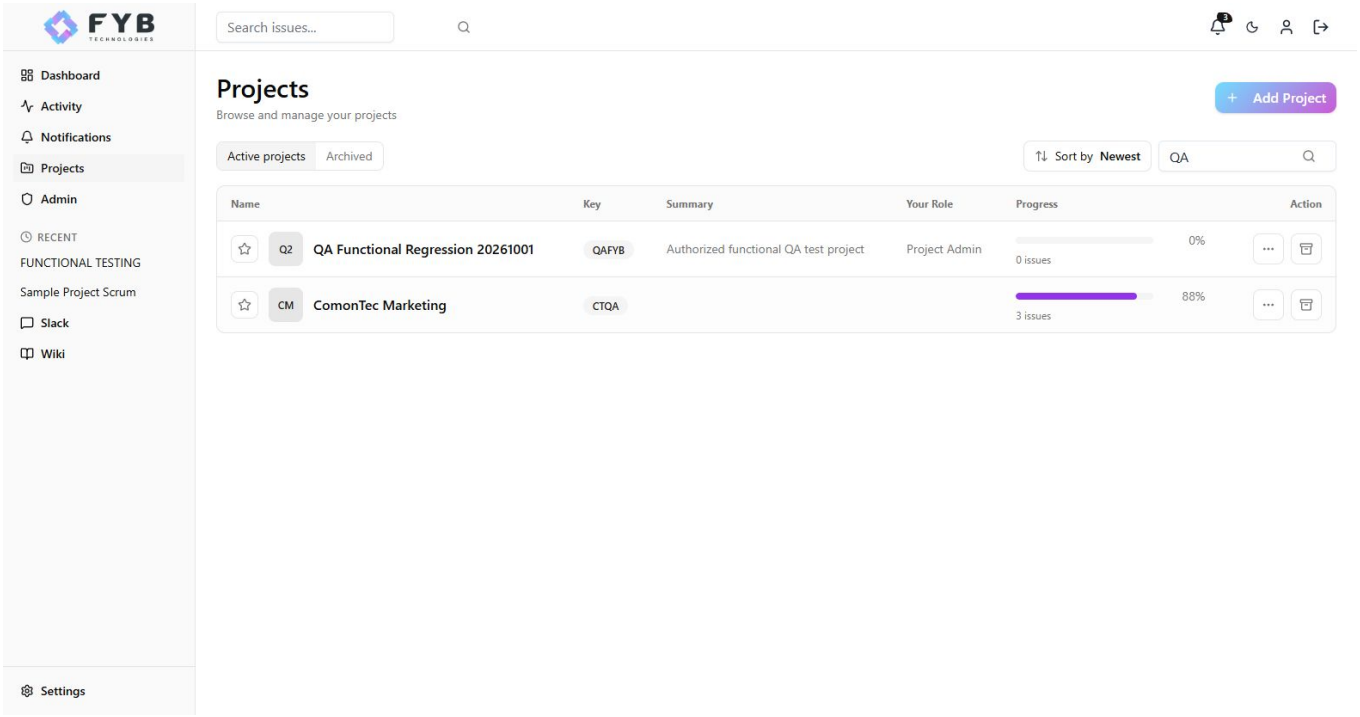

Evidence E15 - Earlier global search - O03

No visible search result; unresolved. Screenshots reflect their capture time; later fixtures/edits may differ.

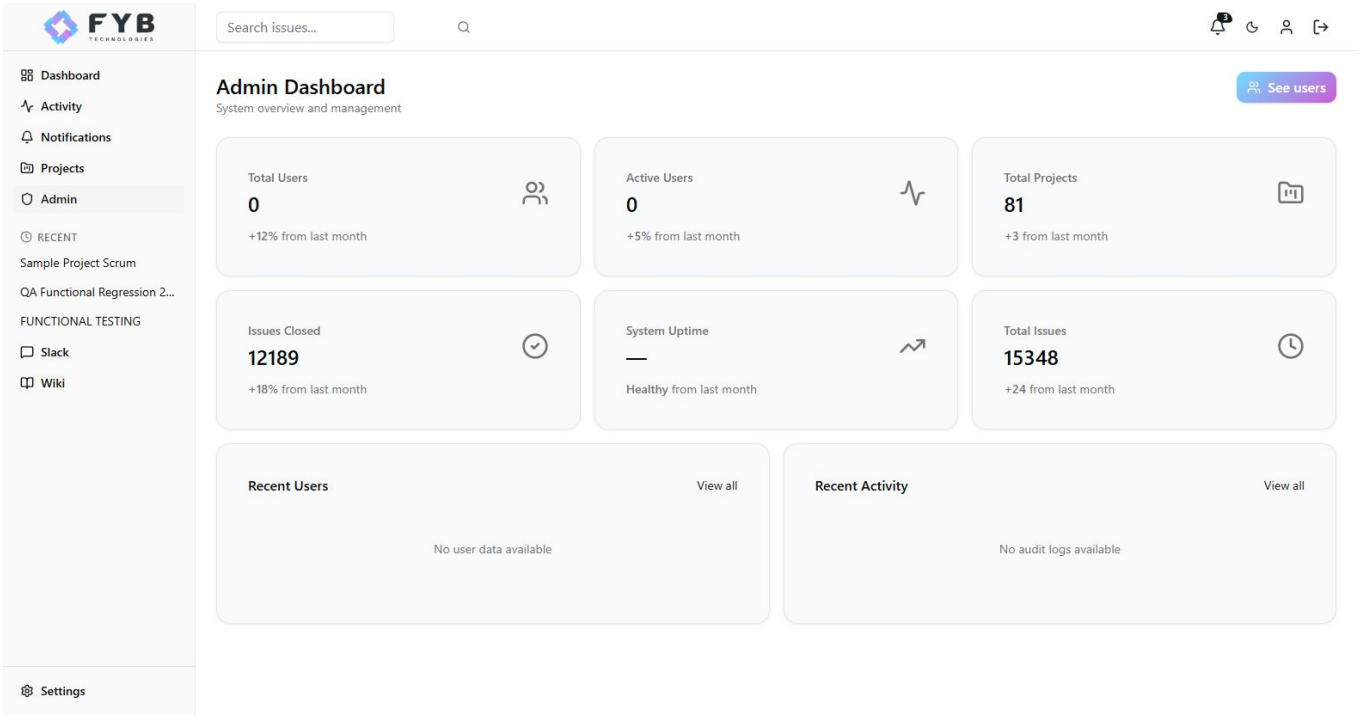

Evidence E16 - Earlier SuperAdmin project creation

QAFYB creation result. Screenshots reflect their capture time; later fixtures/edits may differ.

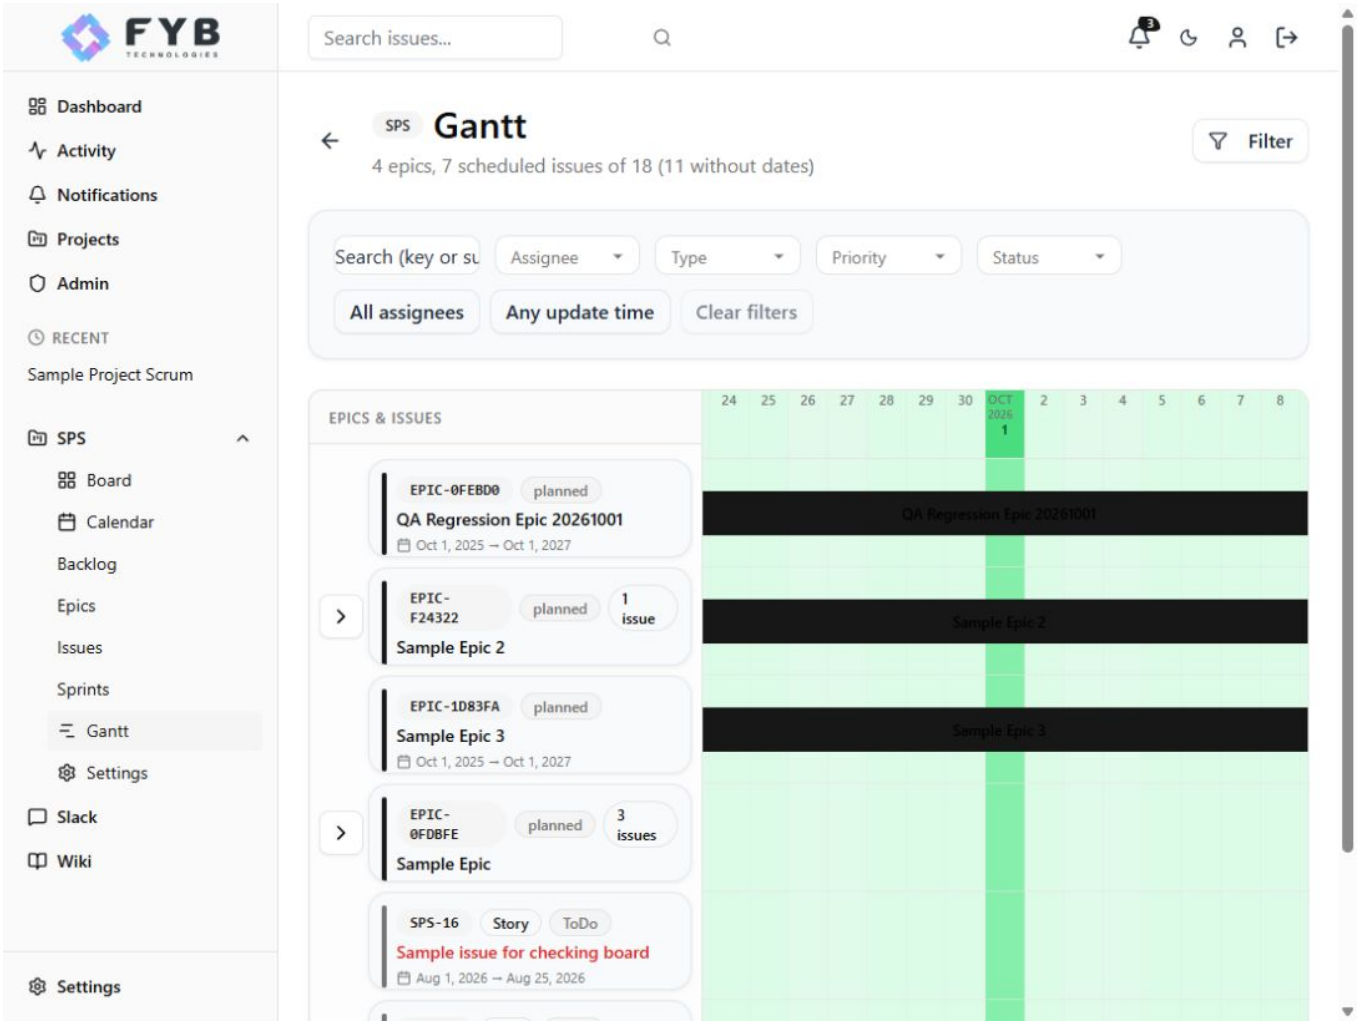

Evidence E17 - Earlier zero-user dashboard

Earlier reproduction of D01. Screenshots reflect their capture time; later fixtures/edits may differ.

Evidence E18 - Earlier Gantt reproduction

Earlier reproduction of D02. Screenshots reflect their capture time; later fixtures/edits may differ.

Evidence E19 - Earlier overview counts

Counting semantics remain to be confirmed. Screenshots reflect their capture time; later fixtures/edits may differ.
