FYB / QUALITY ASSURANCE

Three-role Regression Retest

2 October 2026 | Asia/Shanghai | Desktop UI testing

https://dev-jira.fybtech.xyz/projects

Assessment: further validation required

Results	50 checks: 36 PASS, 11 FAIL, 1 INCONCLUSIVE, 2 INSPECTED.
Defects	9 previously reported defect groups reproduced; 2 newly confirmed issues: backlog stale after sprint completion and contradictory velocity report.
Changed	Empty project validation now shows required-field errors after the request finishes. The earlier missing-feedback finding was not reproduced; no deployment or code fix is established.
Contents	Role perspectives; comparison of prior findings; defect reproduction and impact; all 50 expected/actual checks; test state and coverage limits; screenshot evidence.

Test context and role perspectives

This is a new retest performed on 2 October 2026, using the three supplied accounts. Previous results are compared where a matching scenario was repeated; earlier runs are not counted as current passes. Controls were tested through the visible UI, with DOM observations and screenshots. Loading responses were allowed to finish before interpreting results.

Expected results are based on control labels, common UI behavior, role restrictions and consistency across views. No formal acceptance criteria were supplied. No source, API, database, security penetration, load, cross-browser or mobile testing was performed. Passwords are omitted.

Accounts and role scope

SuperAdmin	rafael.pineda@patolomius.com - global SuperAdmin; global navigation and QARA available.
Admin	mocekij762@pumpoly.com - moce, global Admin and QARA Project Admin.
Member	sabaye4398@pumpoly.com - sabye, global User and QARA Member.

SuperAdmin perspective

Results	Login, project validation/search, prior issue data persistence, whitespace edit/Cancel, empty search/reset and calendar navigation passed. Theme tooltip, preference labels, administrative user metrics and Gantt dates still fail. Export contents remain unverified.

Admin perspective

Results	Fresh QA sprint create, assignment, start, scoped board and persisted completion passed. Audit filters/reset and lifecycle entries passed. Immediate completion view stayed stale until reload. Velocity report contradicted completed state and displayed an unsupported empty-sprint average.

Member perspective

Results	Login, issue scope/reset, shared QA summary update, five admin-route denials, other-author comment restrictions, project settings restriction and chat guards passed. Count wording, Wiki controls/Cancel metadata, project denial message and enabled forbidden archive still fail.

PASS verifies only the stated outcome. FAIL identifies the stated UI/data inconsistency; a denied mutation can pass backend restriction but fail feedback. INSPECTED covers rendering/form guards without completing the whole workflow. INCONCLUSIVE means the expected outcome could not be established.

Comparison with previous findings

F01 | Empty project feedback | NOT REPRODUCED

Evidence	R004 - completed response gives Name/Key required and key-format validation.

F02 | Theme tooltip | REPRODUCED

Evidence	R002 - Switch to dark theme remains after dark toggle.

F03 | Preference checkbox names | REPRODUCED

Evidence	R003 - three unnamed checkboxes.

F04 | Singular count grammar | REPRODUCED

Evidence	R031 - 1 active issues; Admin sprint list also showed 1 sprints.

F05 | Wiki +Create inert | REPRODUCED

Evidence	R040 - no feedback before/after space selection; root menu works.

F06 | Wiki Cancel metadata | PARTIALLY REPRODUCED

Evidence	R042 - author/tags change again; version stays v2 this time, rather than earlier v0.

D01 | Admin user metrics | REPRODUCED

Evidence	R006 - dashboard0 total/active; directory253 total/38 active.

D02 | Undated Gantt schedule | REPRODUCED

Evidence	R013 - Not set detail, but Oct 2 2025-Oct 2 2027 in Gantt; dates shifted from Oct 1 yesterday.

D03 | Wrong Member project denial | REPRODUCED

Evidence	R044 - attachment permission error for project creation.

D04 | Enabled forbidden archive | REPRODUCED

Evidence	R043 - offered confirmation, backend Insufficient project role; QARA stays active.

U027 | Assignment backlog stale observation | NOT REPRODUCED

Evidence	R019 - saved assignment immediately updates counters1/2. A separate completion refresh issue is recorded below.

U021 | Issue export | INCONCLUSIVE

Evidence	R009 - no download event within15seconds; file content unverified.

Not reproduced means the specified symptom was absent in this run. It does not prove a deployed fix. In particular, the empty-project test now waits for the asynchronous response; the earlier run may have assessed feedback too early.

Defects: reproduction and impact

N01 | Medium | Stale backlog after sprint completion

Check	R022
Steps	Admin: create QA Retest Sprint 20261002, assign QARA-4, Start, then Complete from Backlog.
Expected	Refresh unfinished work into backlog immediately.
Actual	Sprint section disappears, but counters stay1 in sprints/2 backlog and QARA-4 is absent. Reload shows 0/3 and QARA-4. Persisted completion works; immediate UI is stale.
Evidence	completion-immediate.jpg and matching DOM snapshot

N02 | Medium | Contradictory velocity report

Check	R024
Steps	Admin: open completed QA Retest Sprint 20261002 > Velocity Report.
Expected	Reflect completed sprint history; use zero/unavailable average for no completed work or label a demo value.
Actual	Header says Completed, two completed sprints in list; report says No completed sprints yet and Average Completion Time3.2days with0issues. UI contradiction confirmed; calculation/source was not inspected.
Evidence	velocity.jpg and matching DOM snapshot

D01 | Medium | Incorrect administrative metrics

Check	R006
Steps	SuperAdmin: compare Admin dashboard and Accounts after both load.
Expected	Consistent user totals or explicit unavailable state.
Actual	Dashboard total/active0/0 and no recent data; directory253/38.
Evidence	admin-dashboard-final.jpg and matching DOM snapshot

D02 | Medium | Dates invented for undated epic

Check	R013
Steps	Open undated QA Role Epic20261001 detail, then Gantt.
Expected	Show unscheduled or clearly label fallback.
Actual	Detail Start/End Not set; Gantt Oct 2 2025-Oct 2 2027. Fallback moves with current date.
Evidence	gantt.jpg and matching DOM snapshot

D03 | Medium | Unrelated Member denial message

Check	R044
Steps	Member: Add Project; Name QA Member Permission Retest20261002, keyQAMR2; Create.
Expected	Project-specific denial.
Actual	You do not have permission to attach files to this issue. No project created.
Evidence	member-project-denied.jpg and matching DOM snapshot

D04 | Low | Enabled Member archive action

Check	R043
Steps	Member: QARA project list > Archive project > Archive.
Expected	Hide/disable forbidden action before confirmation.
Actual	Server rejects Insufficient project role. UI still offers action; backend restriction works.
Evidence	member-archive-denied.jpg and matching DOM snapshot

F02 | Low | Stale theme tooltip

Check	R002
Steps	SuperAdmin: Toggle theme to dark and inspect target tooltip.
Expected	Switch to light theme.
Actual	Switch to dark theme remains; light restored.
Evidence	superadmin-dark.jpg and matching DOM snapshot

F03 | Medium | Unnamed preference controls

Check	R003
Steps	SuperAdmin: Profile settings > Preferences; inspect checkboxes.
Expected	Distinct accessible names.
Actual	Three checkboxes have no accessible name despite visible explanatory text.
Evidence	preferences.jpg and matching DOM snapshot

F04 | Low | Singular count grammar

Check	R031
Steps	Member: Only my issues with one result.
Expected	1 active issue.
Actual	1 active issues; sprint list also uses1 sprints.
Evidence	member-singular.jpg and matching DOM snapshot

F05 | Medium | Wiki Create no response

Check	R040
Steps	Member: Wiki > +Create without/with Tististeng selection; compare Create at root.
Expected	Creation menu or explanatory disabled state.
Actual	+Create gives no feedback; Create at root shows Create page/Create folder.
Evidence	wiki-create-no-space.jpg and matching DOM snapshot

F06 | Medium | Wiki Cancel changes author/tags

Check	R042
Steps	Member: save existing QA draft with qa/retest20261002 tags; edit title then Cancel.
Expected	Preserve saved metadata.
Actual	Title reverts; author changes Member email toapi@system, tags disappear. Version remainsv2. Local prototype UI regression, not established server data loss.
Evidence	wiki-after-cancel.jpg and matching DOM snapshot

SuperAdmin - all recorded checks

R001 | Login | PASS

Expected	Valid credentials open authenticated dashboard
Actual	Signed in; Logout and role navigation visible.

R002 | Theme tooltip | FAIL

Expected	Dark mode target tooltip changes to light
Actual	Tooltip remains Switch to dark theme after toggle.
Prior	F02

R003 | Preference accessible labels | FAIL

Expected	Each checkbox has distinct accessible name
Actual	Three unnamed checkboxes with visible explanatory text.
Prior	F03

R004 | Empty project validation | PASS

Expected	Required field feedback after empty Create
Actual	Completed response shows Name must not be empty, Key must not be empty and key format message.
Prior	F01 - not reproduced

R005 | Project search and description | PASS

Expected	QARA returns one correct project with persisted literal summary
Actual	QARA alone displayed retained description containing & and 3 parent issues.

R006 | Administration metrics | FAIL

Expected	Dashboard totals agree with populated directory
Actual	Dashboard total/active users 0/0, no recent users/audits; directory 253 total and 38 active.
Prior	D01

R007 | Issue search empty state | PASS

Expected	No matching query gives clear empty state
Actual	Zero results and No issues match your filters; reset enabled.

R008 | Clear issue filters | PASS

Expected	Restore four retained issues
Actual	Defaults restored and four issues visible.

R009 | Issue export | INCONCLUSIVE

Expected	Capture produced file and verify contents
Actual	No download event captured within 15 seconds; Export returned enabled. File production/content unverified.
Prior	U021

R010 | Retained summary/link/comment | PASS

Expected	Prior saved issue data persists across fresh login
Actual	Literal <tag> & Member verified summary, Relates to QARA-1 and edited QA comment present.

R011 | Whitespace summary edit | PASS

Expected	Save disabled for whitespace-only summary
Actual	Save disabled with three spaces; Cancel used.

R012 | Issue Cancel | PASS

Expected	Preserve original summary
Actual	Original Member verified literal summary restored.

R013 | Undated epic Gantt fallback | FAIL

Expected	Unscheduled epic not presented as actual dates
Actual	Epic detail Start/End Not set; Gantt displays Oct 2 2025 to Oct 2 2027, one day later than yesterday.
Prior	D02

R014 | Calendar Next/Today | PASS

Expected	Advance month then return October 2026
Actual	November displayed; Today returned October 2026.

Admin - all recorded checks

R015 | Login | PASS

Expected	Admin authenticated with assigned project scope
Actual	Dashboard opens after valid credentials.

R016 | Completed sprint persistence | PASS

Expected	Prior completed QA sprint retains state
Actual	Completed, zero issues, capacity 0, Oct 1 to Oct 1; Create Sprint available.

R017 | Sprint required name | PASS

Expected	Empty create displays required-field message
Actual	Sprint name is required displayed, no sprint created.

R018 | Create QA sprint | PASS

Expected	Valid name and goal create Planned sprint
Actual	QA Retest Sprint 20261002 created Planned, zero issues.

R019 | Sprint assignment and immediate refresh | PASS

Expected	Persist assignment and refresh backlog immediately
Actual	QARA-4 displays fresh sprint; closing dialog shows 1 in sprints and 2 backlog without reload.
Prior	U027 - not reproduced

R020 | Start sprint | PASS

Expected	Planned becomes Active
Actual	Complete sprint replaces Start sprint.

R021 | Active sprint Board | PASS

Expected	Assigned QARA-4 shown in scoped ToDo
Actual	Board names QA Retest Sprint and shows 1 of 1 issue, QARA-4 To Do.

R022 | Completion immediate backlog refresh | FAIL

Expected	Completed unfinished issue appears without reload
Actual	Immediately sprint section vanished but counters stayed 1/2 and QARA-4 absent; reload shows 0/3 and QARA-4.
Prior	New N01 - stale completion view

R023 | Complete sprint persisted state | PASS

Expected	Completed sprint and unfinished issue returned
Actual	After reload QARA-4 in backlog; fresh sprint list Completed, 0 issues.

R024 | Velocity report empty/completed consistency | FAIL

Expected	Completed sprint appears consistently; empty metrics not invented
Actual	Selected sprint Completed and two completed in list; report No completed sprints yet, Average Completion Time 3.2 days despite 0 issues.
Prior	Earlier velocity observation - confirmed UI inconsistency

R025 | Burndown empty rendering | INSPECTED

Expected	Report switches and shows zero-data state
Actual	Burndown chart opens for completed zero-issue sprint; no numerical reconciliation performed.

R026 | Audit unmatched actor | PASS

Expected	Explicit empty state
Actual	No audit logs found matching your filters displayed.

R027 | Audit reset and lifecycle entries | PASS

Expected	Reset restores created/start/complete records
Actual	Latest rows show current QA sprint creation, start, completion and QARA-4update by Admin.

R028 | Audit Metadata | PASS

Expected	Expand completed event metadata
Actual	Completed sprint metadata expanded inline.

Member - all recorded checks

R029 | Login | PASS

Expected	Member dashboard authenticates
Actual	Dashboard opens, no Admin nav.

R030 | My issues scope | PASS

Expected	Only Member assigned issue
Actual	QARA-2 only, assigned sabye,1 total.

R031 | Count grammar | FAIL

Expected	1 active issue singular
Actual	1 active issues still displayed.
Prior	F04

R032 | Clear My issues | PASS

Expected	Restore four issues
Actual	Four retained issues restored.

R033 | Other-author comment controls | PASS

Expected	Comment readable; no edit/delete for Member
Actual	SuperAdmin comment readable, tabpanel no Edit/Delete.

R034 | Cross-author summary update | PASS

Expected	Project Member can update shared QA issue
Actual	QARA-4 saved Member retested 20261002 suffix and literal special characters.

R035 | Direct /admin | PASS

Expected	Deny administrative UI
Actual	Access denied shown.

R036 | Direct /admin/accounts | PASS

Expected	Deny administrative UI
Actual	Access denied shown.

R037 | Direct /admin/analytics | PASS

Expected	Deny administrative UI
Actual	Access denied shown.

R038 | Direct /admin/system | PASS

Expected	Deny administrative UI
Actual	Access denied shown.

R039 | Direct /admin/audit-logs | PASS

Expected	Deny administrative UI
Actual	Access denied shown.

R040 | Wiki +Create feedback | FAIL

Expected	Respond or explain unavailable action
Actual	Before/after selecting Tististeng +Create no dialog; Create at root opens menu.
Prior	F05

R041 | Wiki save prototype metadata | PASS

Expected	Saved tags and author displayed
Actual	QA draft saved with qa/retest20261002 tags; frontend-only localStorage prototype, shared server persistence unverified.

R042 | Wiki Cancel metadata | FAIL

Expected	Cancel retains saved tags/author/version
Actual	Title reverts; author changes from Member email to api@system and saved qa/retest tags disappear. Version remains v2 in this retest (earlier run showed v0).
Prior	F06

R043 | Forbidden archive UI | FAIL

Expected	Hide/disable prohibited archive before submission
Actual	Enabled Archive confirmation; submission Insufficient project role, QA project remains active.
Prior	D04 - UI mismatch; backend blocks

R044 | Project denial message | FAIL

Expected	Explain project permission denial
Actual	Create rejected with unrelated You do not have permission to attach files to this issue; QAMR2 not created.
Prior	D03

R045 | Sprint management restriction | PASS

Expected	Read completed sprints with creation/management unavailable
Actual	Two completed QA sprints visible; no Create Sprint/Start/Complete controls.

R046 | Project settings route | PASS

Expected	Member cannot manage project configuration
Actual	Direct QARA settings redirects to Dashboard.

R047 | Chat whitespace | PASS

Expected	Whitespace cannot send
Actual	Three spaces leave Send disabled; composer cleared without sending.

R048 | Channel management restriction | PASS

Expected	Members readable with forbidden management disabled
Actual	sabye/moce listed; Members settings/Delete channel disabled.

R049 | Password form labels/empty guard | INSPECTED

Expected	Current/New/Confirm labels; empty Update blocked
Actual	Three labeled fields, Update password disabled. No credentials entered; canceled.

R050 | Logout | PASS

Expected	Return signedout login
Actual	Sign in form visible; authenticated session ended.

Retained QA state and coverage limits

State after this run

Project	QARA remains active; previous description and QA UI project group unchanged. Failed Member create did not produce QAMR2. Failed archive did not change QARA.
Sprint	New QA Retest Sprint 20261002 is Completed, 0 issues,0SP capacity, Oct 2-Oct 2. Existing QA Role Sprint20261001 stays Completed. QARA-4 returned to backlog.
Issue	QARA-4 summary now: QA UI text <tag> & summary 20261001 - Member retested 20261002. ToDo/Medium/Unassigned; prior relationship and edited comment retained.
Wiki	Existing QA UI Draft20261001 used for local prototype test. Before Cancel savedMember/v2/qa+retest20261002 tags; afterCancel authorapi@system andtagsabsent, v2displayed.
Sessions	Logged out between roles and ended final Member session. Remember me unchecked during each sign-in. No passwords saved in report. No credential, global role or permanent deletion actions performed.

This report contains every recorded check from this retest, not an all-functions-correct certification. The broader page/button inventories and150 historical check records remain in the previous 1October detailed report. They are not current results and have not all been rerun.

Issue export remains inconclusive: no download event captured within15seconds. Browser capture may be a limitation; no confirmed export failure is asserted.

Wiki editor explicitly states frontend-only prototype/localStorage. Shared/backend persistence and server data loss are not established by this test.

Account creation/edit/deactivation/delete, password changes, reset-email delivery, lockout, Remember me persistence, session expiry and API authorization remain unexecuted.

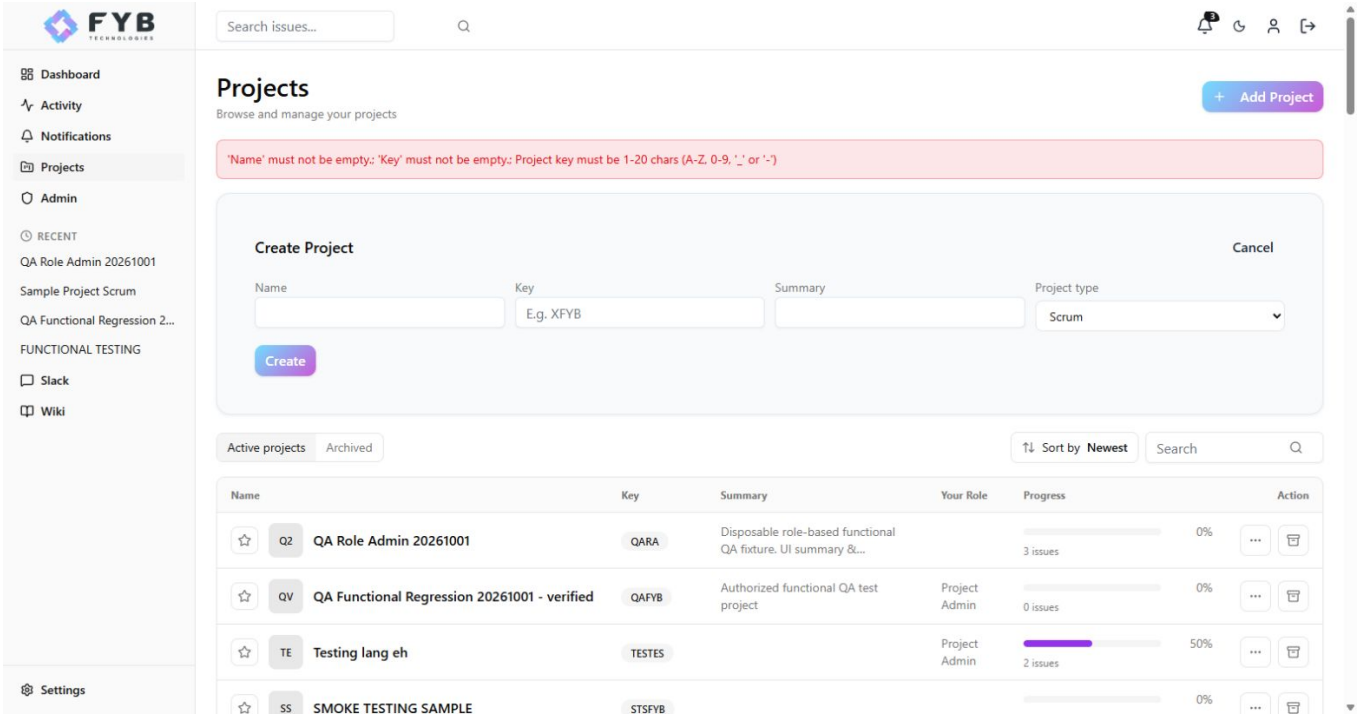

Attachments/upload/download integrity, permanent delete, every workflow transition, Kanban drag/drop, estimates/capacity reconciliation, project configuration saves, concurrent updates and comprehensive report calculations remain unverified.

Chat sending, DM/group creation and notification delivery were not performed. Password form empty guard and burndown rendering are inspections; they do not establish complete workflows.

Desktop in-app browser only. Mobile/responsive, cross-browser, complete keyboard/screen-reader accessibility, timezone boundary, performance and security testing remain outside this run.

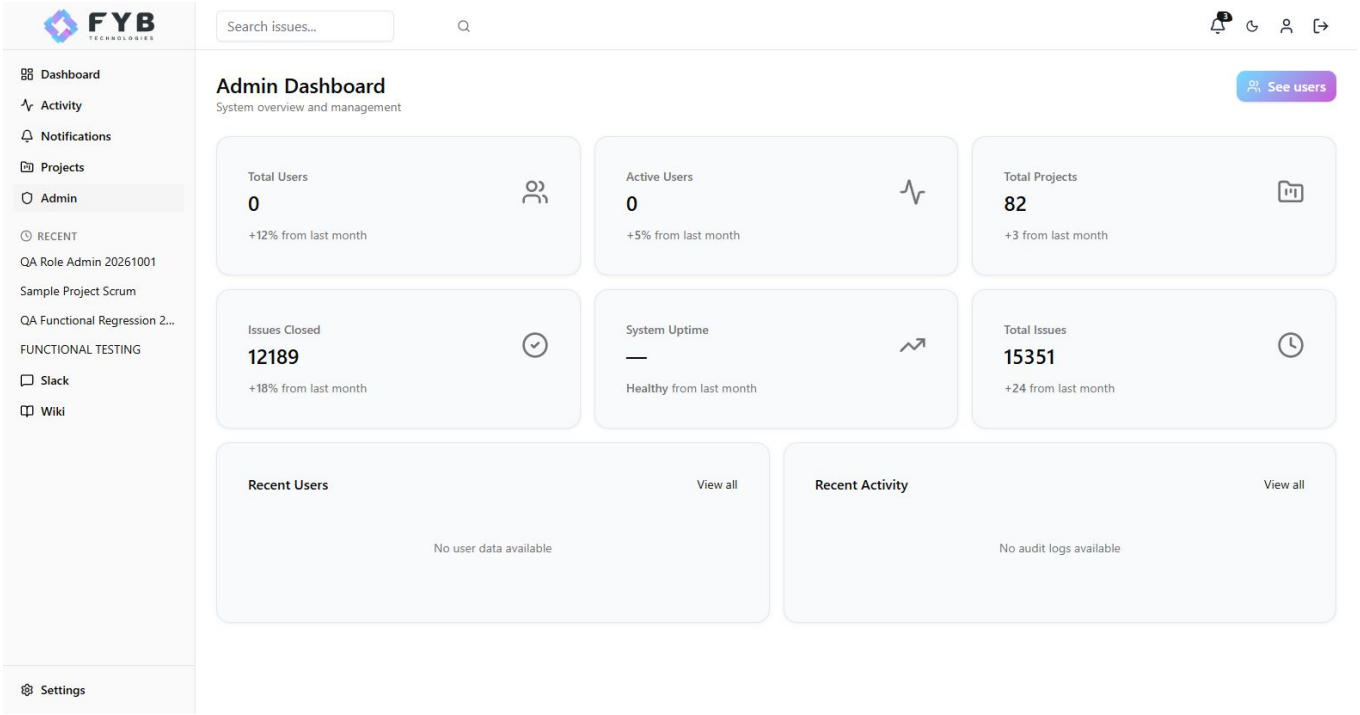

Screenshot evidence

E01 / R004 - Required project validation appears after completed response.

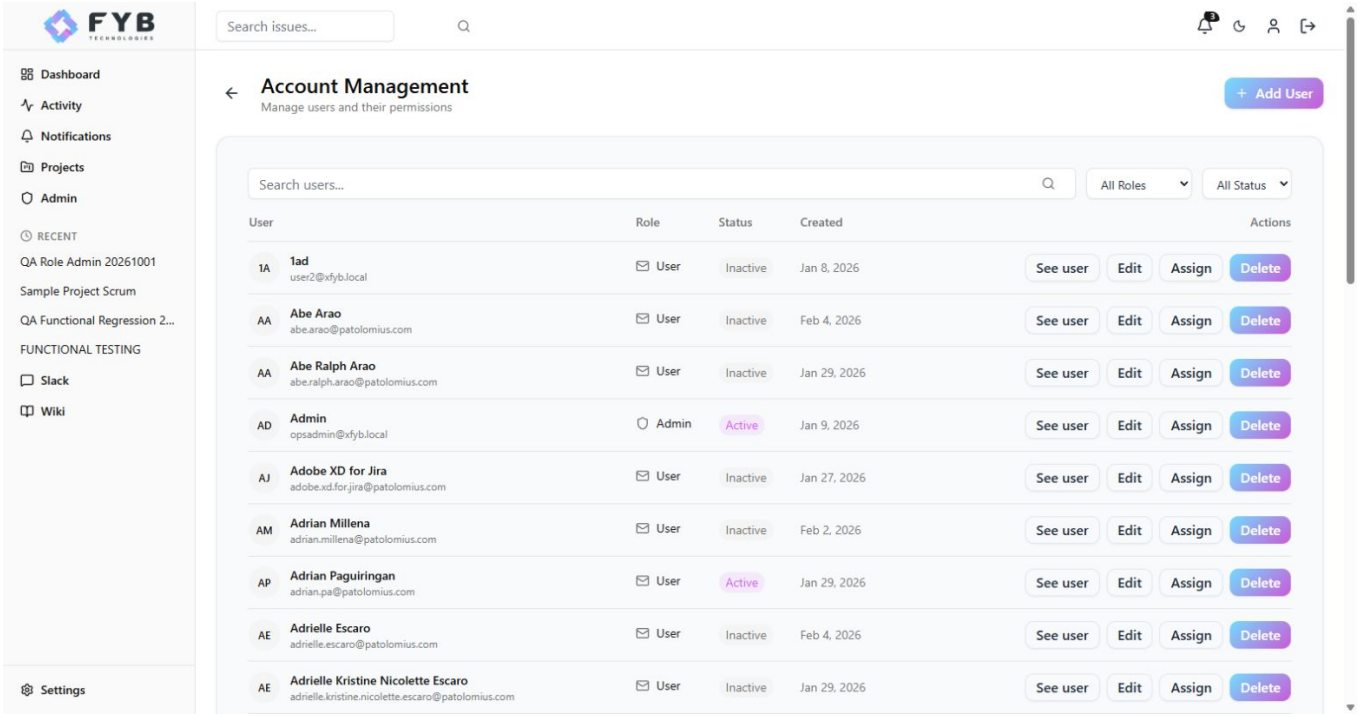

Point-in-time screenshot; expected/actual behavior and limitations are recorded in the matching check.

E02 / R006 - Administrative dashboard incorrect user totals.

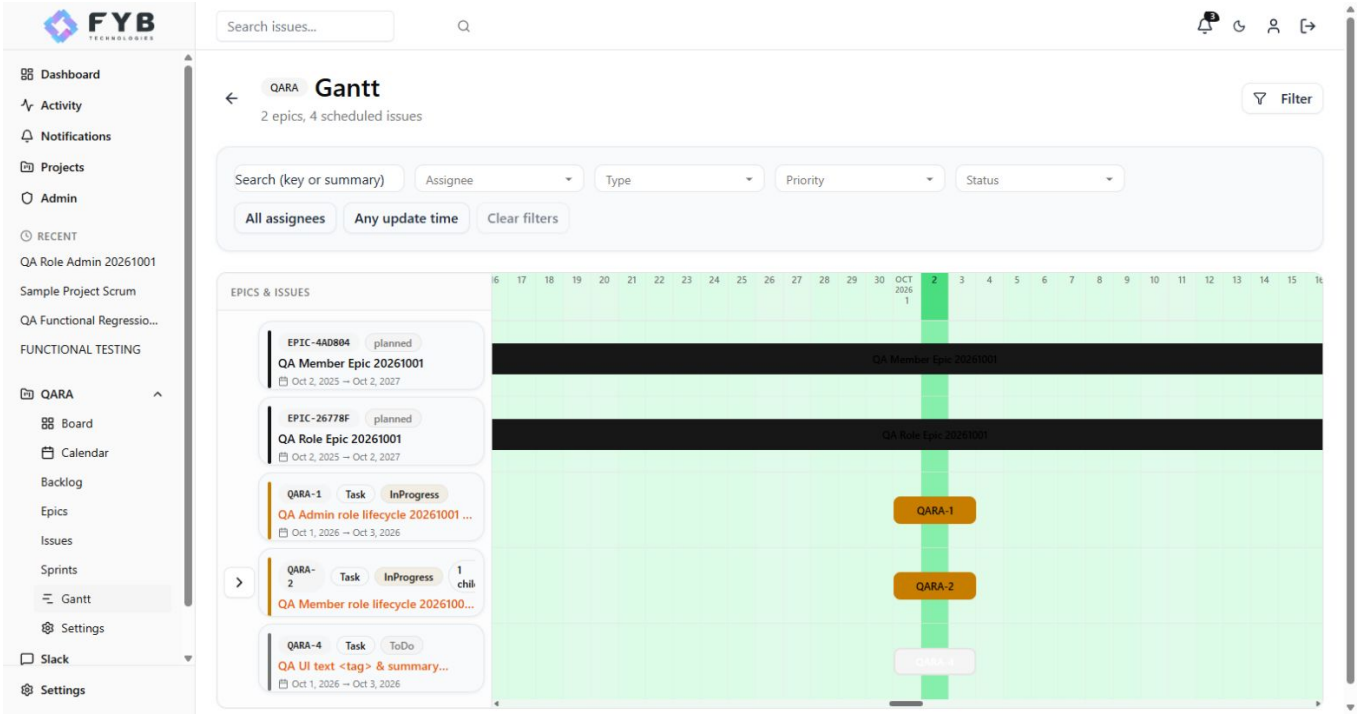

Point-in-time screenshot; expected/actual behavior and limitations are recorded in the matching check.

E03 / R006 - Directory comparison:253 total,38 active.

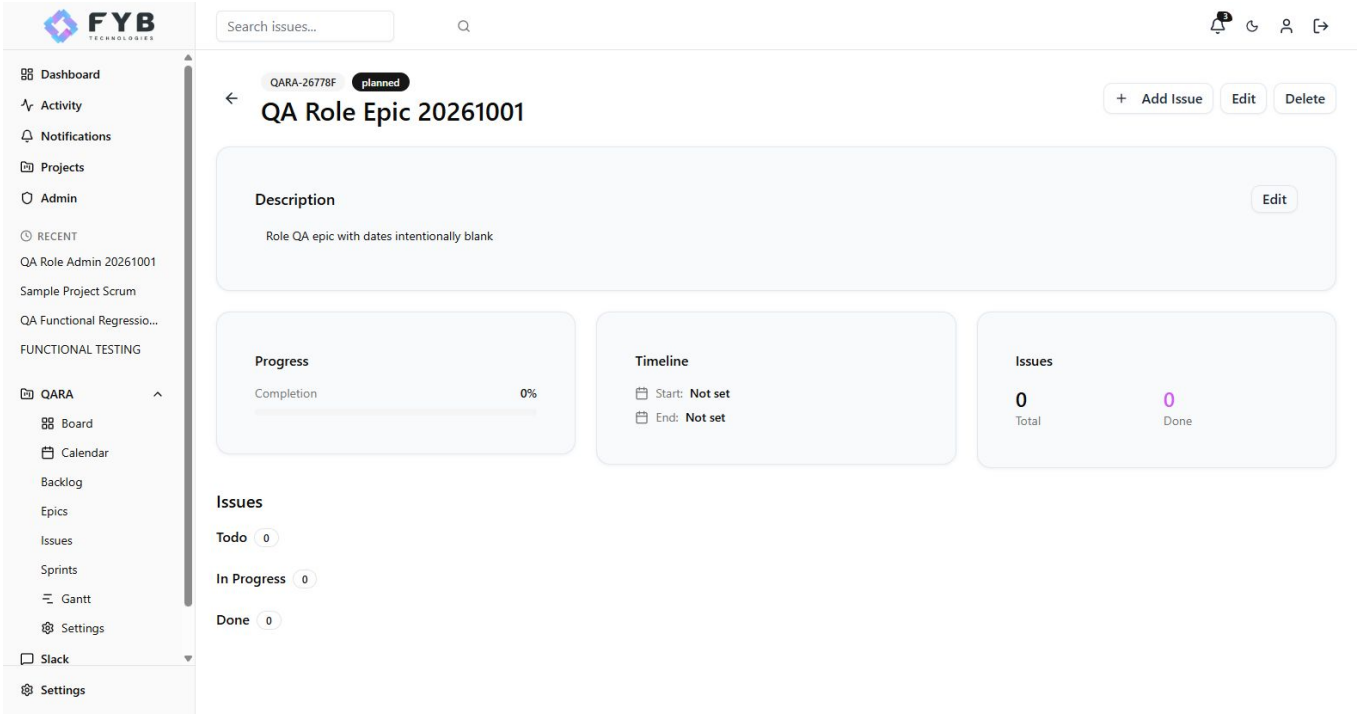

Point-in-time screenshot; expected/actual behavior and limitations are recorded in the matching check.

E04 / R013 - Undated epic visualized with Oct 2 2025-Oct 2 2027 fallback.

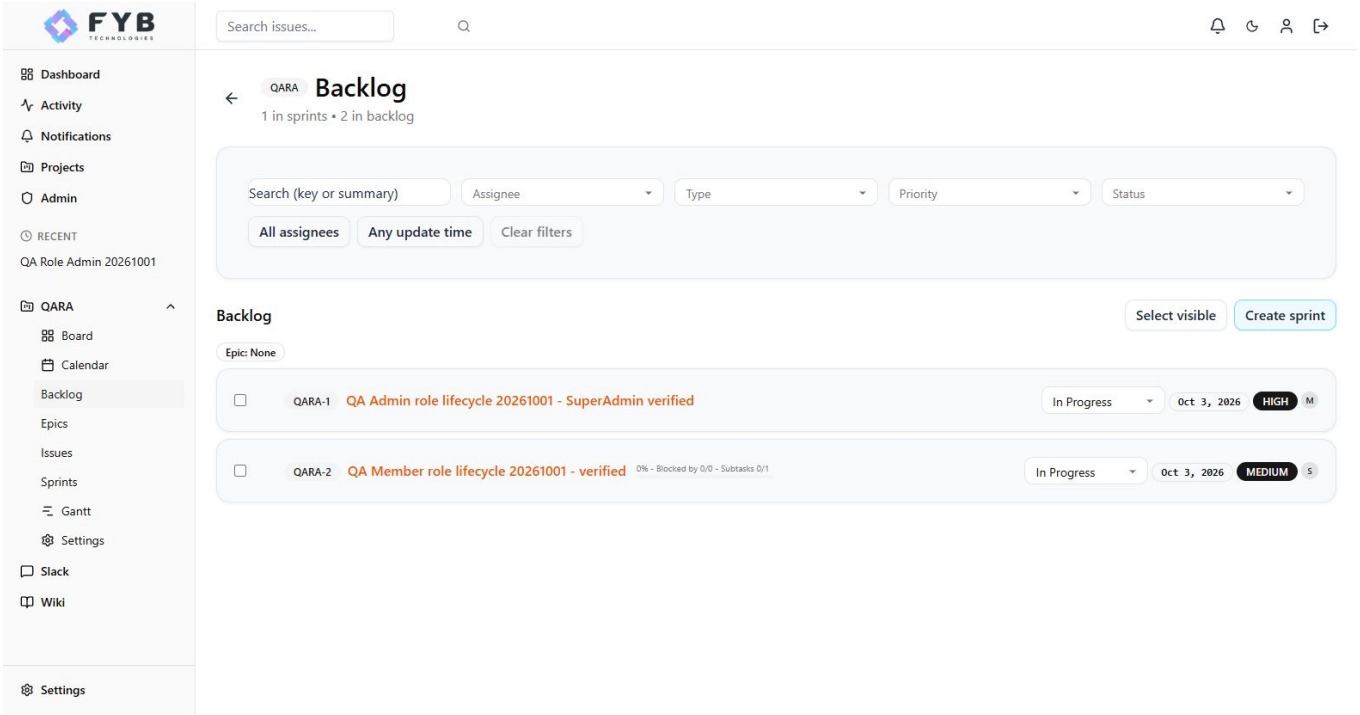

Point-in-time screenshot; expected/actual behavior and limitations are recorded in the matching check.

E05 / R013 - Same epic underlying dates Not set.

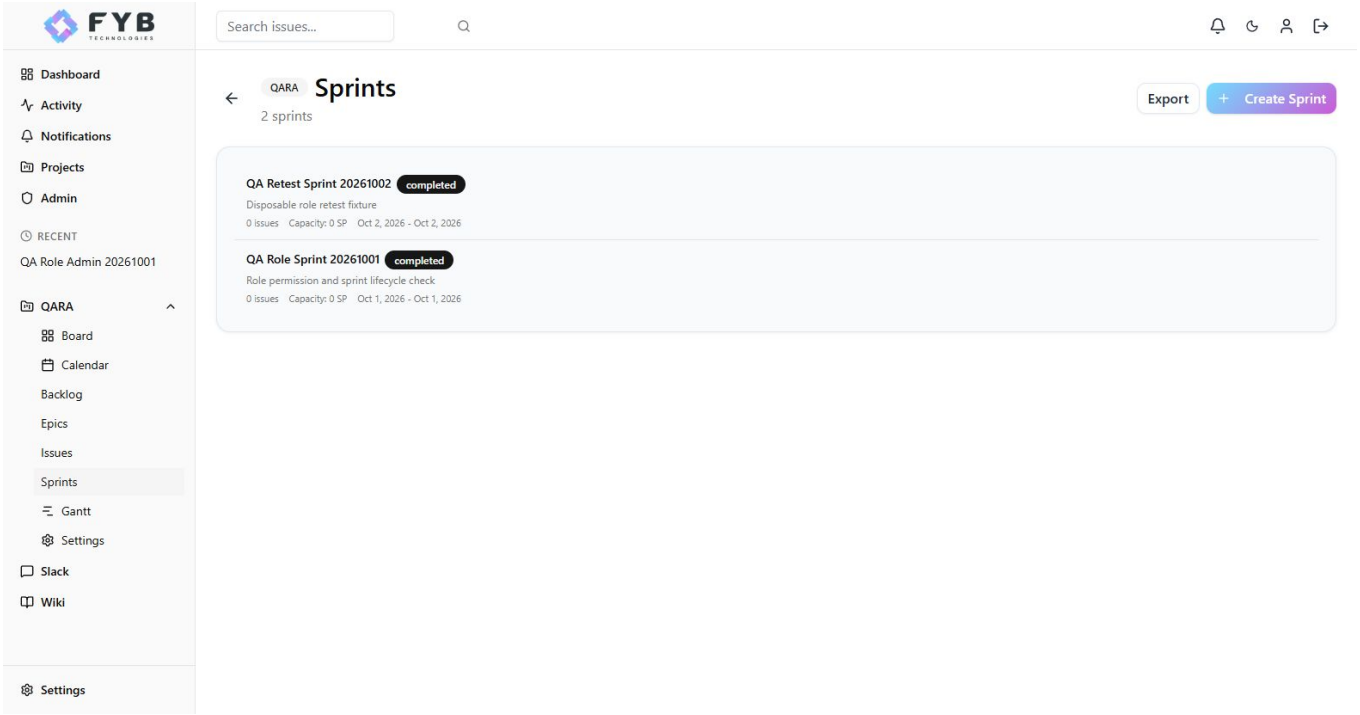

Point-in-time screenshot; expected/actual behavior and limitations are recorded in the matching check.

E06 / R022 - Sprint section gone while1/2 counters remain, QARA-4 absent.

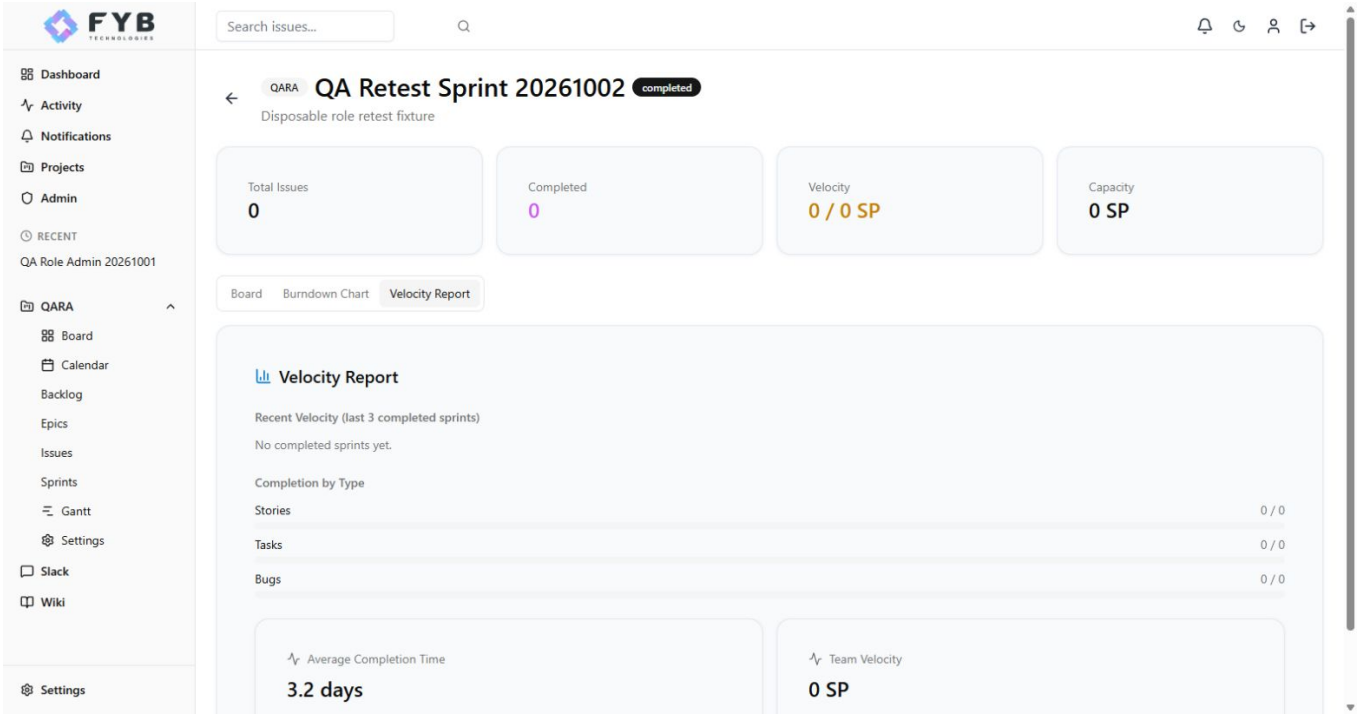

Point-in-time screenshot; expected/actual behavior and limitations are recorded in the matching check.

E07 / R023 - New QA sprint persisted Completed.

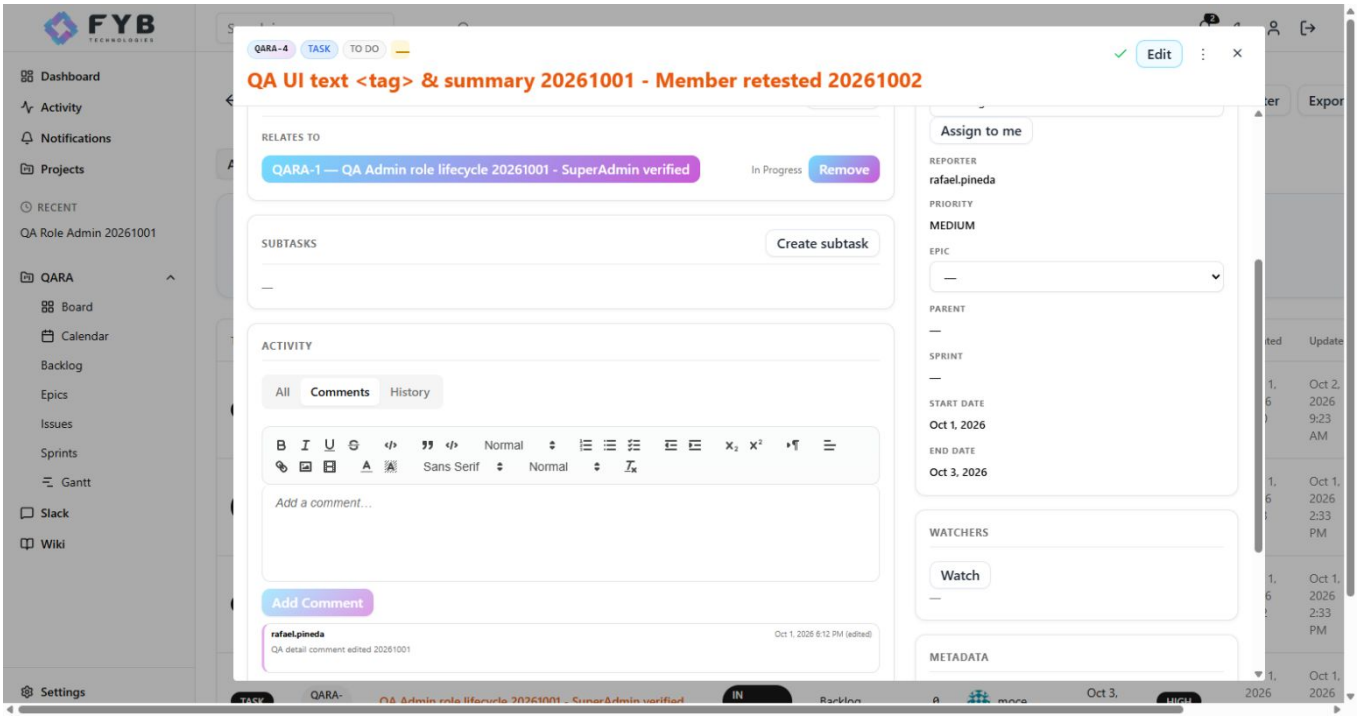

Point-in-time screenshot; expected/actual behavior and limitations are recorded in the matching check.

E08 / R024 - Completed header with No completed sprints yet and3.2days average.

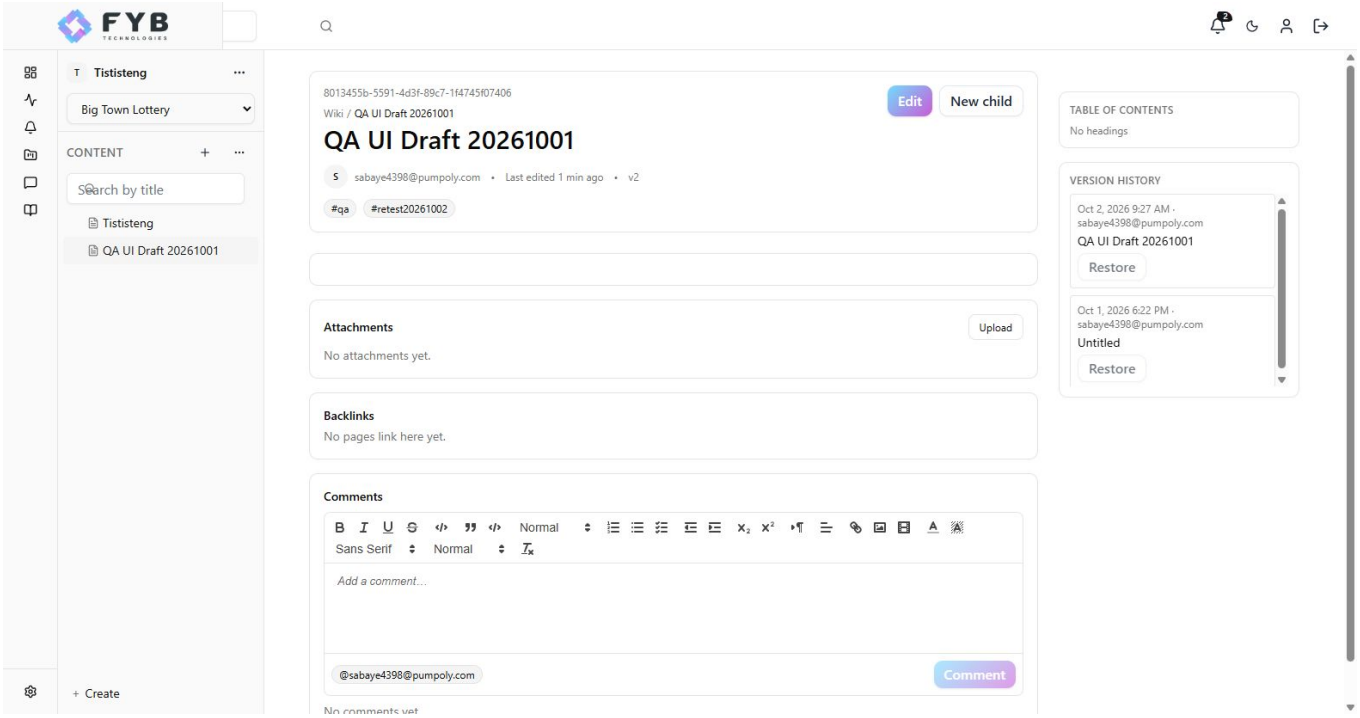

Point-in-time screenshot; expected/actual behavior and limitations are recorded in the matching check.

E09 / R034 - Member saved shared QA summary retest suffix.

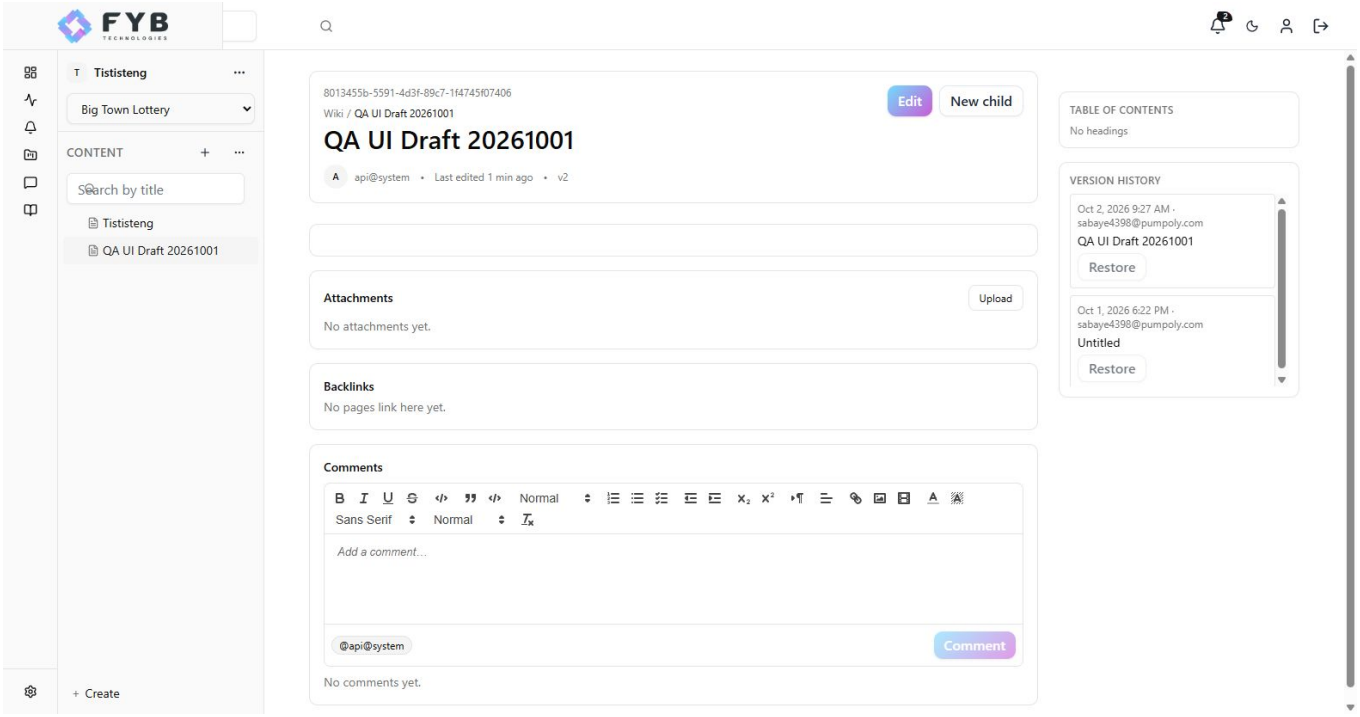

Point-in-time screenshot; expected/actual behavior and limitations are recorded in the matching check.

E10 / R041 - SavedMember/v2 metadata with qa/retest tags.

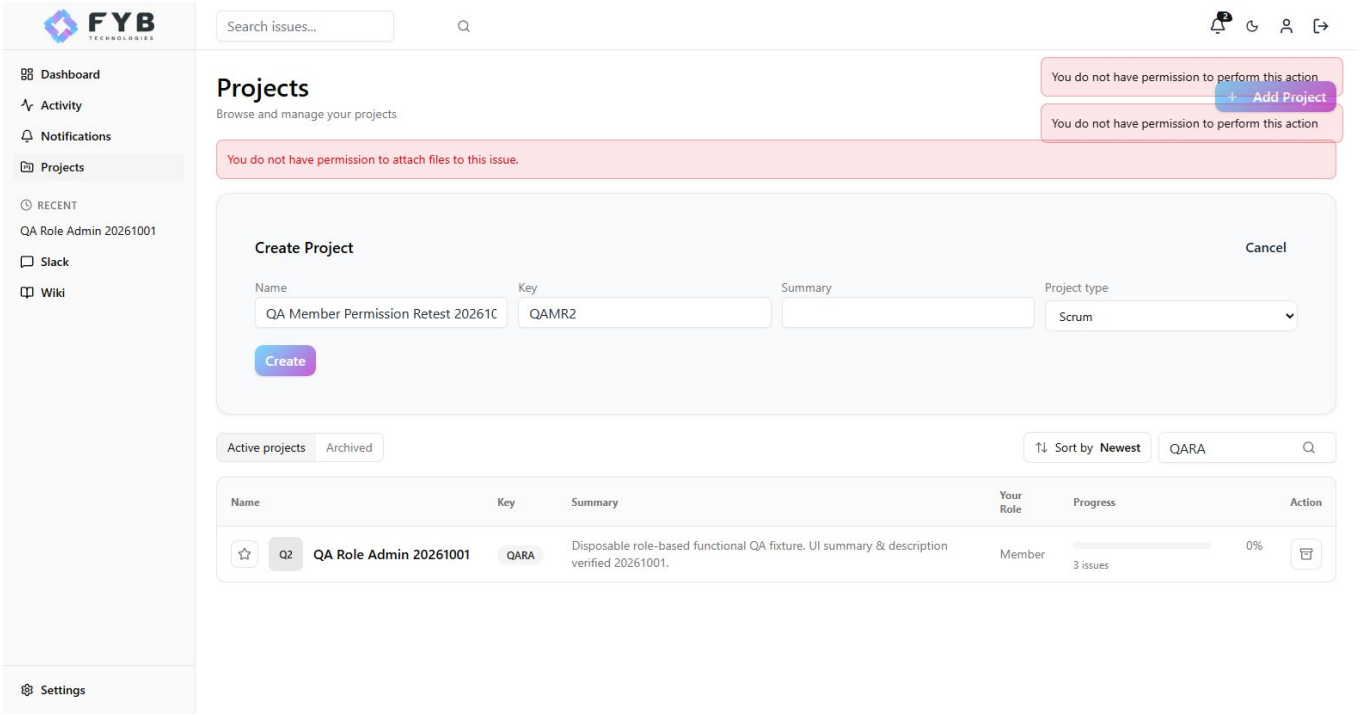

Point-in-time screenshot; expected/actual behavior and limitations are recorded in the matching check.

E11 / R042 - Cancel changes author and removes tags; versionv2.

Point-in-time screenshot; expected/actual behavior and limitations are recorded in the matching check.

E12 / R044 - Unrelated attachment error for denied project creation.

Point-in-time screenshot; expected/actual behavior and limitations are recorded in the matching check.
