FYB / QUALITY ASSURANCE

Three-role Regression Retest

6 October 2026 | Asia/Shanghai | Desktop UI testing

https://dev-jira.fybtech.xyz/projects

Assessment: further validation required

Results	44 recorded checks: 33 PASS, 9 FAIL, 1 INCONCLUSIVE, 1 NOT REPRODUCED under changed scope.
Changes	Wiki Cancel now preserves saved author/tags/version. Project required-field validation continues to pass. Planned epics no longer appear in Gantt; this does not prove the underlying date issue is fixed.
Remaining	Nine previously confirmed defect groups reproduced. Issue export remains inconclusive.
Contents	Test context; comparison with 2 October; defect reproduction; all 44 expected/actual checks; retained state and coverage limits; screenshot evidence.

Test context and role perspectives

Fresh interactive UI retest performed on 6 October 2026. Previous results are compared only where matching scenarios were repeated; historical checks are not current passes. Evidence is visible DOM/accessibility snapshots and screenshots. Asynchronous responses were allowed to finish before classification.

Accounts

SuperAdmin	rafael.pineda@patolomius.com - global SuperAdmin.
Admin	mocekij762@pumpoly.com - moce, global Admin / QARA Project Admin.
Member	sabaye4398@pumpoly.com - sabye, global User / QARA Member.

Expected behavior is based on labels, common UI behavior, role restrictions and consistency between views. No formal acceptance criteria were supplied. No source, API, database, performance, penetration, cross-browser or mobile testing was performed. Passwords are omitted.

SuperAdmin perspective

Passed	Authentication, project validation/search, retained issue data, whitespace summary guard and Cancel.
Findings	Theme tooltip, preference names and administrative totals still fail. Export unverified. Gantt scope changed to In Progress issues; Planned epics remain available in the Epic directory.

Admin perspective

Passed	Created fresh sprint, assigned QARA-4, started sprint, verified scoped board, completed sprint and verified persisted return to backlog. Audit lifecycle records present.
Findings	Completion view stale until reload. Velocity says no completed sprints and 3.2-day average despite zero issues and Completed header.

Member perspective

Passed	Five direct admin-route denials, issue scope/reset, cross-author QA summary save, other-author comment restriction, Wiki save/Cancel, project settings restriction and chat guards.
Findings	Singular grammar, inert Wiki +Create, wrong project-denial text and enabled forbidden archive remain.

PASS covers only the stated outcome. FAIL can concern feedback despite correctly denied backend action. INCONCLUSIVE means an expected outcome was not established. NOT REPRODUCED under changed scope means the original symptom is not visible in the current scenario, not a verified code fix.

Comparison with 2 October

F01 | Empty project validation | PASS

Evidence	O004: Name/Key validation after completed response, consistent with 2 October.

F02 | Theme tooltip | REPRODUCED

Evidence	O002: Switch to dark theme remains in dark mode.

F03 | Preference names | REPRODUCED

Evidence	O003: Three unnamed checkboxes.

F04 | Singular grammar | REPRODUCED

Evidence	O031: 1 active issues.

F05 | Wiki +Create | REPRODUCED

Evidence	O035: No response; root menu works.

F06 | Wiki Cancel metadata | NOT REPRODUCED / PASS

Evidence	O037: saved author, tags and v3 preserved after Cancel. Original title restored.

D01 | Admin user totals | REPRODUCED

Evidence	O006: Dashboard 0 total / 0 active, loaded directory 255 / 41. Directory was 253 / 38 on 2 October.

D02 | Undated Gantt epic | SCOPE CHANGED

Evidence	O011: 0 epics, 2 In Progress issues. Planned QA epics excluded. Underlying fabricated-date fix not established.

D03 | Member project denial | REPRODUCED

Evidence	O039: Unrelated attachment error for project creation.

D04 | Member archive UI | REPRODUCED

Evidence	O038: Enabled action then Insufficient project role. Backend denial works.

N01 | Completion stale view | REPRODUCED

Evidence	O020: Immediate 1/0 and empty backlog; reload 0/1 with QARA-4.

N02 | Velocity contradiction | REPRODUCED

Evidence	O022: Completed header, No completed sprints yet, 3.2-day average for zero issues.

U021 | Export download | INCONCLUSIVE

Evidence	O010: No download captured within 15 seconds; file contents unverified.

Not reproduced does not prove a deployment or code fix. Current Gantt explicitly describes In Progress issues; Backlog now excludes the two In Progress QA issues. These scope differences are recorded as observations without inventing acceptance rules.

Remaining defects - reproduction and impact

D01 | Medium | Incorrect admin user totals

Check	O006
Steps	SuperAdmin: open Admin dashboard, then Accounts after row data loads.
Actual / impact	Dashboard Total/Active Users 0/0; directory 255/41. Recent user/audit data absent. Compare totals or show explicit unavailability.

N01 | Medium | Stale completion view

Check	O020
Steps	Admin: create October 6 QA sprint, assign QARA-4, Start, Complete in Backlog.
Actual / impact	Success toast and sprint removed, but counters stay1/0 and no issue shown. Reload0/1 includes QARA-4. Persisted workflow works; refresh does not.

N02 | Medium | Contradictory velocity report

Check	O022
Steps	Admin: open completed QA Retest Sprint 20261006 > Velocity Report.
Actual / impact	Completed header and three completed QA sprints; report No completed sprints yet and 3.2 days average with zero issues. Source/calculation not inspected.

D03 | Medium | Wrong denial message

Check	O039
Steps	Member: Add Project, name QA Member Permission Retest 20261006, key QAMR6, Create.
Actual / impact	Project creation rejected with attachment permission error. Use project-specific feedback. No project created.

D04 | Low | Forbidden archive offered

Check	O038
Steps	Member: QARA project list > Archive project > Archive.
Actual / impact	Enabled confirmation offered, server Insufficient project role. Project stays active. Hide/disable unsupported action.

F02 | Low | Stale theme tooltip

Check	O002
Steps	SuperAdmin: Toggle theme to dark, inspect tooltip.
Actual / impact	Tooltip remains Switch to dark theme; target should be light. Light restored.

F03 | Medium | Unnamed preference checkboxes

Check	O003
Steps	SuperAdmin: Profile settings > Preferences.
Actual / impact	Three unnamed checkboxes despite explanatory text. Assign distinct accessible names.

F04 | Low | Singular grammar

Check	O031
Steps	Member: Only my issues with one matching assignment.
Actual / impact	1 active issues displayed. Use singular issue.

F05 | Medium | Inert Wiki Create

Check	O035
Steps	Member: Wiki +Create before/after Tististeng selection; compare Create at root.
Actual / impact	No dialog/feedback from +Create, while root page/folder menu responds. Explain or activate the control.

SuperAdmin - all recorded checks

O001 | Login | PASS

Expected	Authenticate valid account
Actual	Dashboard and role navigation available.

O002 | Theme tooltip | FAIL

Expected	Target tooltip changes in dark mode
Actual	Switch to dark theme remains after dark toggle.
Prior	F02

O003 | Preference names | FAIL

Expected	Distinct accessible checkbox names
Actual	Three checkboxes remain unnamed.
Prior	F03

O004 | Empty project validation | PASS

Expected	Required feedback
Actual	Name/Key required and key format messages shown after response.
Prior	F01 not reproduced

O005 | Project search | PASS

Expected	Only QARA fixture returned
Actual	QARA retained project matches search.

O006 | Administration totals | FAIL

Expected	Dashboard agrees with loaded directory
Actual	Dashboard Total/Active Users 0/0 versus loaded directory 255/41; Recent Users and Activity unavailable.
Prior	D01

O007 | Retained issue data | PASS

Expected	Saved summary, link and comment persist
Actual	October 2 Member summary, Relates to QARA-1 and edited QA comment remain.

O008 | Whitespace summary guard | PASS

Expected	Disable Save
Actual	Save disabled for three spaces.

O009 | Issue Cancel | PASS

Expected	Preserve summary
Actual	Original summary restored.

O010 | Issue export | INCONCLUSIVE

Expected	Produce a file and verify content
Actual	No download captured within 15 seconds; file content unverified.
Prior	U021

O011 | Undated epic Gantt | NOT REPRODUCED

Expected	Avoid fabricated dates for unscheduled epics
Actual	Current Gantt shows 0 epics and 2 In Progress issues. Retained Planned epics are excluded; prior date symptom cannot be evaluated under changed scope.
Prior	D02 scope changed; not proof of fix

O012 | Epic availability | PASS

Expected	Prior epics remain readable
Actual	QA Role Epic and QA Member Epic remain in the Epic directory.

Admin - all recorded checks

O013 | Login | PASS

Expected	Authenticate Admin
Actual	Dashboard opens.

O014 | Prior sprint persistence | PASS

Expected	Completed state retained
Actual	October 1 and 2 QA sprints remain Completed.

O015 | Required sprint name | PASS

Expected	Show required-field validation
Actual	Sprint name is required displayed; no empty sprint created.

O016 | Create QA sprint | PASS

Expected	Valid sprint becomes Planned
Actual	QA Retest Sprint 20261006 created Planned.

O017 | Sprint assignment | PASS

Expected	Persist selected sprint
Actual	QARA-4 saved to QA Retest Sprint 20261006.

O018 | Start sprint | PASS

Expected	Planned becomes Active
Actual	Complete sprint replaces Start sprint.

O019 | Scoped sprint Board | PASS

Expected	Show assigned issue
Actual	Fresh sprint Board shows QARA-4 in To Do, 1 of 1 issue.

O020 | Completion immediate refresh | FAIL

Expected	Unfinished issue immediately returns to backlog
Actual	Sprint completed toast and sprint section removed; counters remain 1 in sprints / 0 backlog, with empty backlog. Reload shows 0 / 1 and QARA-4.
Prior	N01

O021 | Completion persisted state | PASS

Expected	Complete sprint and return unfinished work
Actual	After reload QARA-4 is in backlog. Current backlog excludes In Progress issues, so one parent is expected instead of the earlier three.

O022 | Velocity consistency | FAIL

Expected	Reflect completed state and avoid unsupported empty-data averages
Actual	Completed header and three completed QA sprints; report says No completed sprints yet and Average Completion Time 3.2 days with zero issues.
Prior	N02

O023 | Audit lifecycle | PASS

Expected	New QA changes traceable
Actual	Current QA sprint create/start/complete and QARA-4 update entries present.

Member - all recorded checks

O024 | Login | PASS

Expected	Authenticate Member
Actual	Dashboard opens, no Admin navigation.

O025 | Direct /admin | PASS

Expected	Deny administrative UI
Actual	Access denied.

O026 | Direct /admin/accounts | PASS

Expected	Deny administrative UI
Actual	Access denied.

O027 | Direct /admin/analytics | PASS

Expected	Deny administrative UI
Actual	Access denied.

O028 | Direct /admin/system | PASS

Expected	Deny administrative UI
Actual	Access denied.

O029 | Direct /admin/audit-logs | PASS

Expected	Deny administrative UI
Actual	Access denied.

O030 | My issues scope | PASS

Expected	Return only current Member assignment
Actual	QARA-2 assigned to sabye, one total.

O031 | Singular grammar | FAIL

Expected	Display 1 active issue
Actual	1 active issues still displayed.
Prior	F04

O032 | Clear My issues | PASS

Expected	Restore full QA list
Actual	Four QA issues restored.

O033 | Other-author comment controls | PASS

Expected	Read comment without edit/delete controls
Actual	SuperAdmin comment visible; no comment Edit/Delete controls.

O034 | Shared issue summary save | PASS

Expected	Member update preserves literal text
Actual	QARA-4 saved with Member retested 20261006 suffix, literal <tag> and &.

O035 | Wiki Create feedback | FAIL

Expected	Respond or explain restriction
Actual	+Create gives no response before/after selecting a space; Create at root opens page/folder menu.
Prior	F05

O036 | Wiki prototype save | PASS

Expected	Title, tags and author visible after Save
Actual	QA draft saved with qa/retest20261006 tags and Member email; editor explicitly says frontend-only localStorage prototype.

O037 | Wiki Cancel metadata | PASS

Expected	Preserve author, tags and version; discard pending title
Actual	Original title, Member email, qa/retest20261006 tags and v3 remain after Cancel.
Prior	F06 not reproduced

O038 | Forbidden archive UI | FAIL

Expected	Hide or disable prohibited archive
Actual	Enabled confirmation; server rejects Insufficient project role. QARA remains active.
Prior	D04

O039 | Project denial message | FAIL

Expected	Explain project permission denial
Actual	Create rejected with You do not have permission to attach files to this issue. QAMR6 not created.
Prior	D03

O040 | Project settings restriction | PASS

Expected	Deny Member project management
Actual	Direct project settings redirects to Dashboard.

O041 | Sprint management restriction | PASS

Expected	Allow reading with management unavailable
Actual	Three completed QA sprints visible; no Create/Start/Complete controls.

O042 | Chat whitespace guard | PASS

Expected	Disable whitespace Send
Actual	Send disabled for three spaces; composer cleared without an actual message.

O043 | Channel management restriction | PASS

Expected	Disable forbidden management
Actual	Members settings and Delete channel disabled; two members readable.

O044 | Logout | PASS

Expected	End session
Actual	Signed-out login displayed.

Retained state and coverage limits

QA state after this run

Project	QARA active. QAMR6 create denied; Member archive denied. Previous QA description/group retained.
Sprint	New QA Retest Sprint 20261006 Completed, zero issues, capacity0, Oct6-Oct6. October1/2 QA sprints remain Completed. QARA-4 returned to backlog.
Issue	QARA-4 summary: QA UI text <tag> & summary 20261001 - Member retested 20261006. To Do, Medium, Unassigned; prior relationship and edited comment retained.
Wiki	QA UI Draft20261001 saved in frontend prototype with qa/retest20261006 tags, Member author and v3. Those values preserved after Cancel.
Sessions	Logged out between roles and final Member session ended. Remember me unchecked. No password, global role, account or permanent deletion changes performed.

All recorded checks from this run are included. This is not a certification that all functions work. Earlier page inventories and test records remain historical evidence and were not all repeated.

Export file generation/content remains unverified. Absence of a captured browser download is inconclusive, not a confirmed export failure.

Wiki editor explicitly states frontend-only prototype/localStorage. Server/shared persistence and backend data loss were not established.

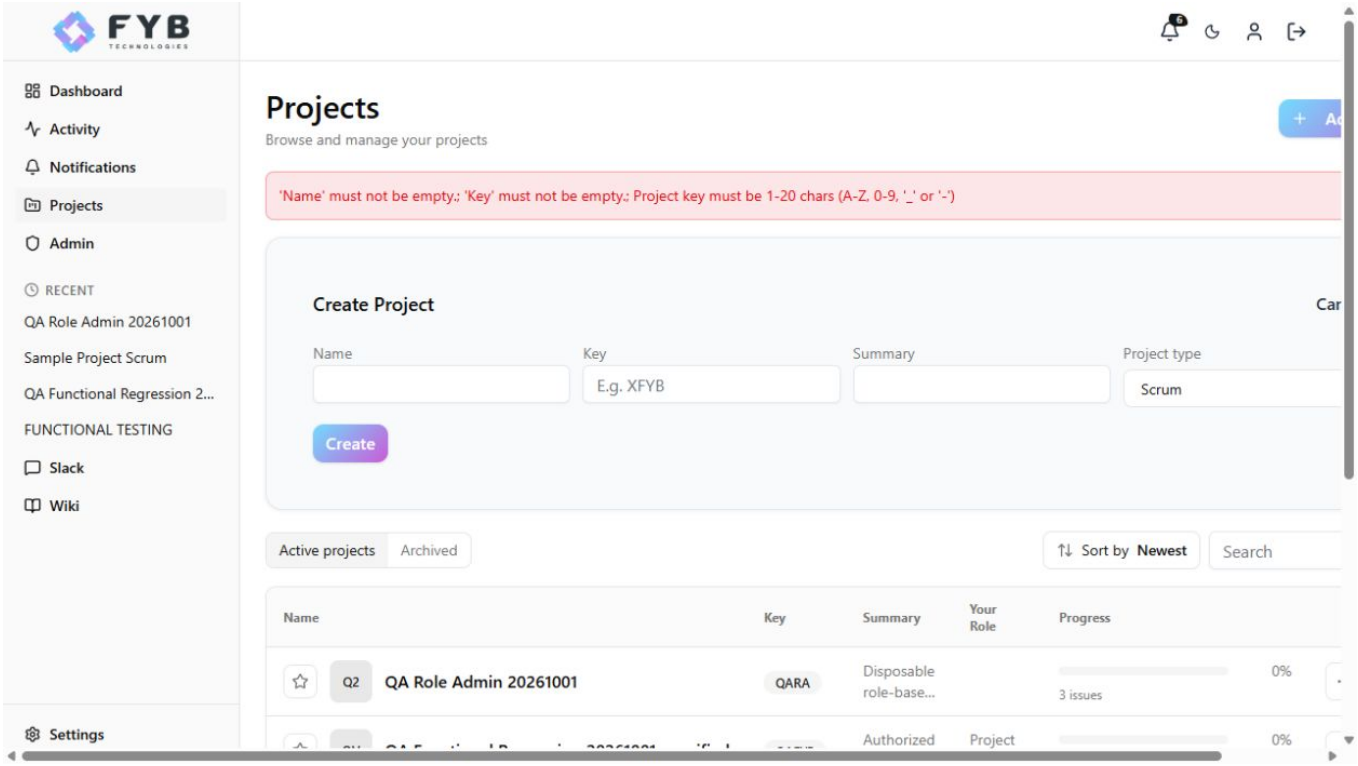

Account mutations, password changes, reset-email delivery, lockout, session expiry, Remember me persistence and API authorization were not executed.

Uploads/download integrity, deletion, every transition combination, Kanban drag/drop, capacity/estimate reconciliation, configuration saves, concurrency and comprehensive report calculations remain unverified.

Chat sending, DM/group creation and notification delivery were not performed. Mobile/responsive, complete keyboard/screen-reader accessibility, cross-browser, timezone boundary, performance and security testing remain outside this pass.

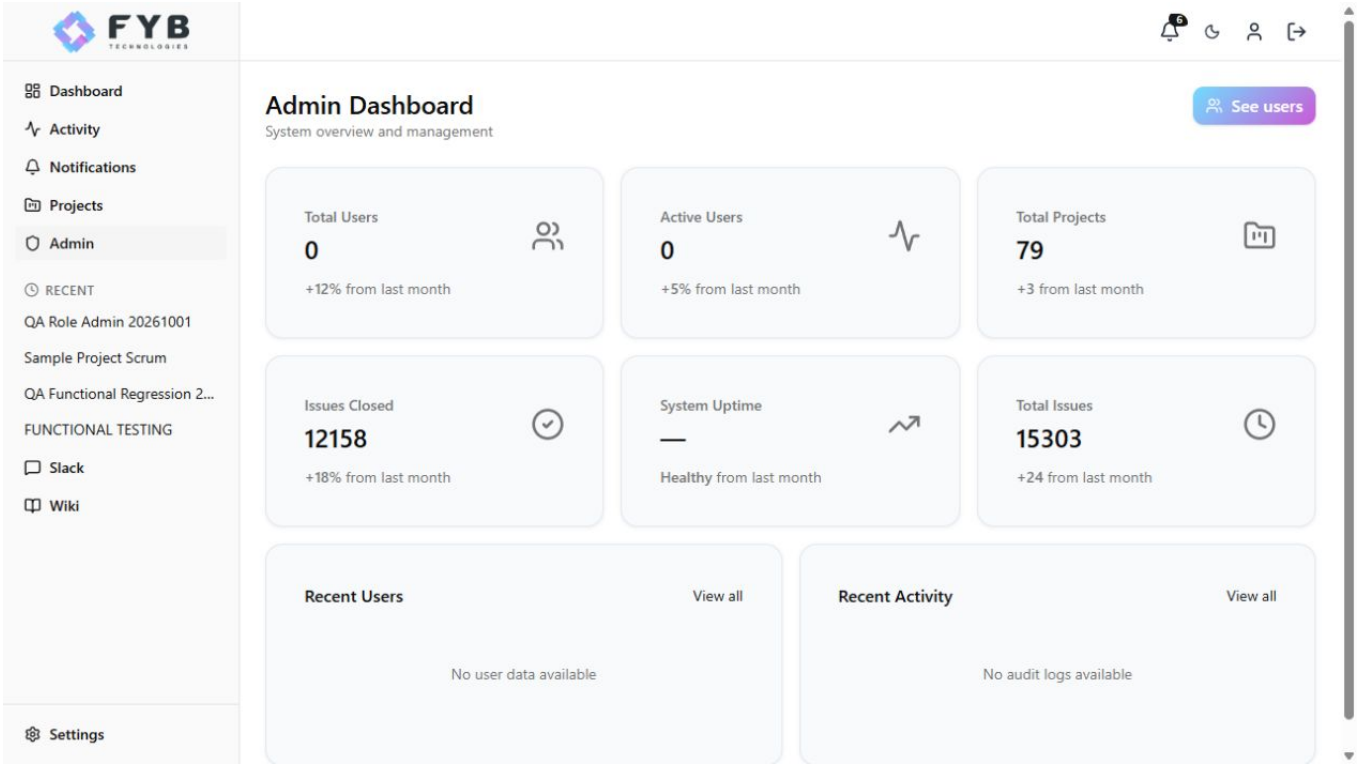

Screenshot evidence

E01 / O004 - Required project fields validated after response.

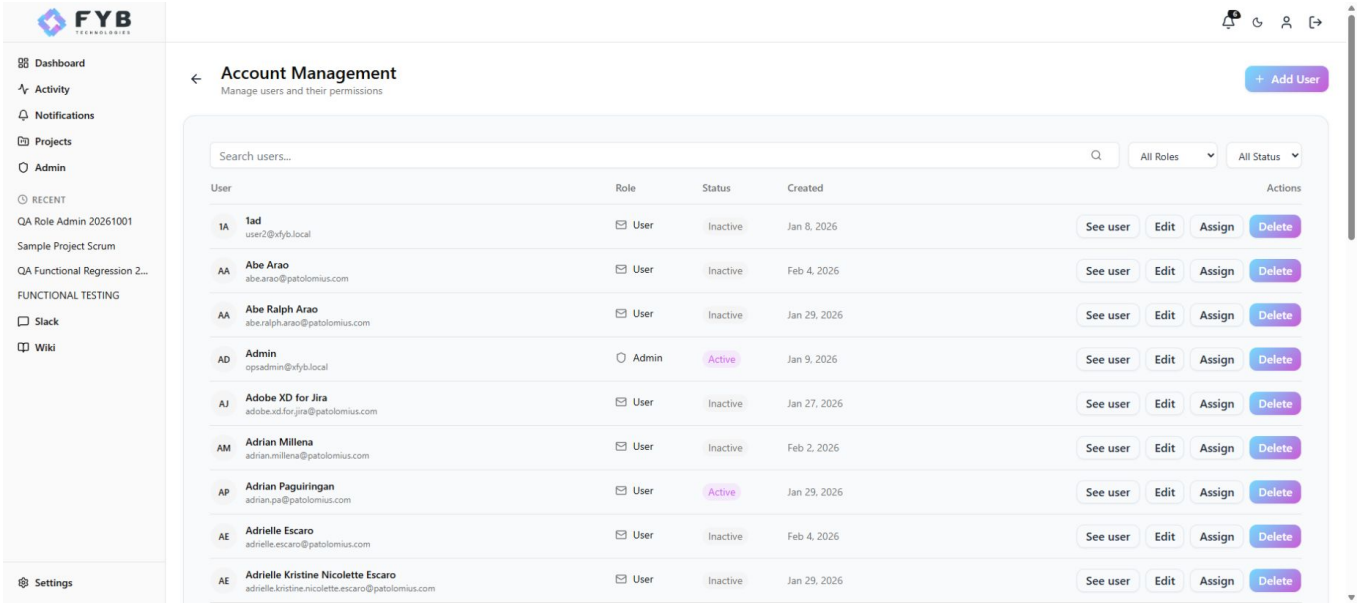

Point-in-time evidence. Expected/actual behavior and limitations are recorded in the matching check.

E02 / O006 - Zero user dashboard metrics.

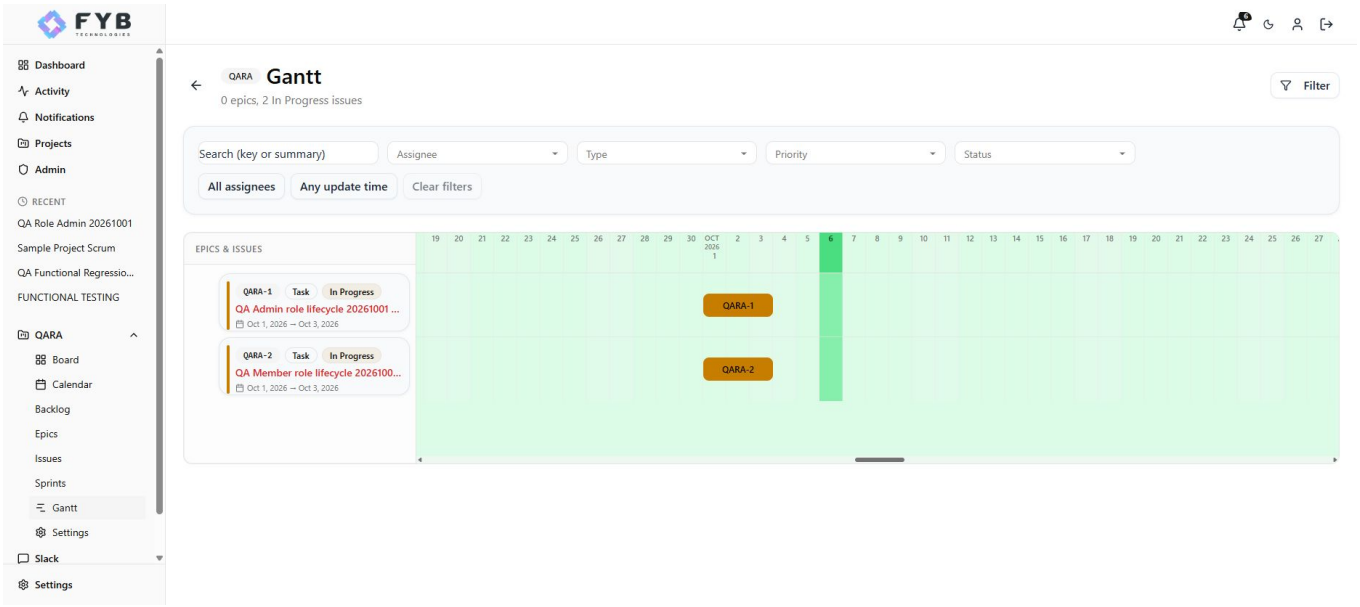

Point-in-time evidence. Expected/actual behavior and limitations are recorded in the matching check.

E03 / O006 - Loaded directory 255 total,41 active.

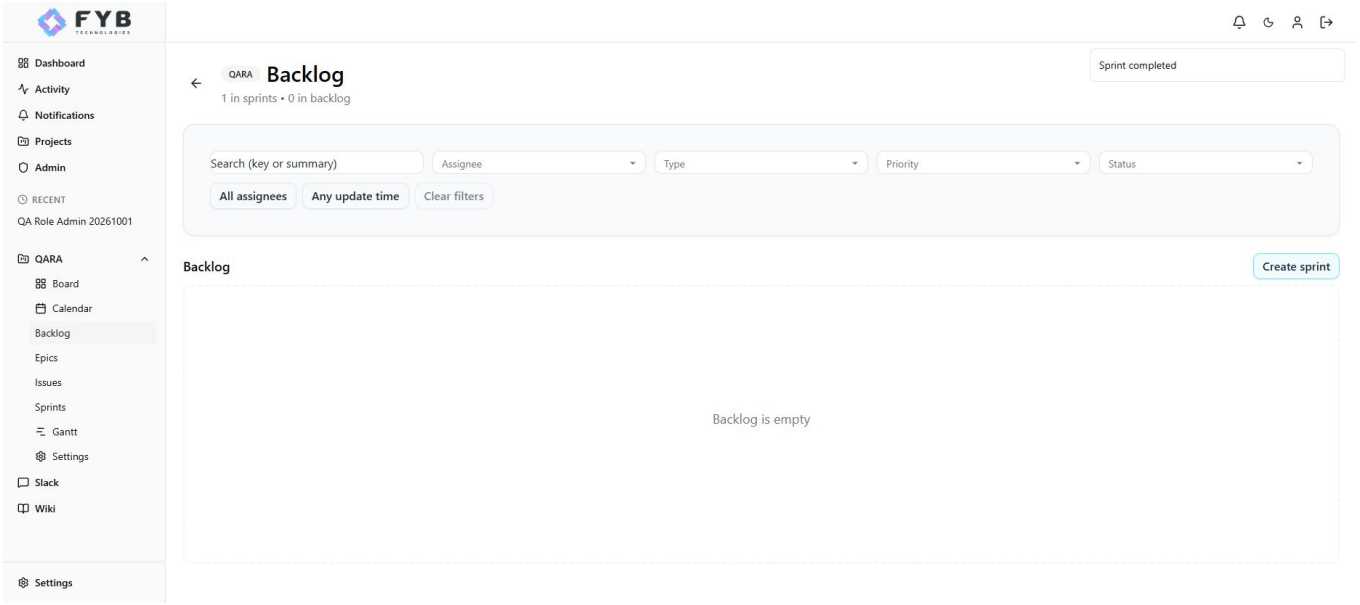

Point-in-time evidence. Expected/actual behavior and limitations are recorded in the matching check.

E04 / O011 - Changed Gantt scope:0epics,2InProgressissues.

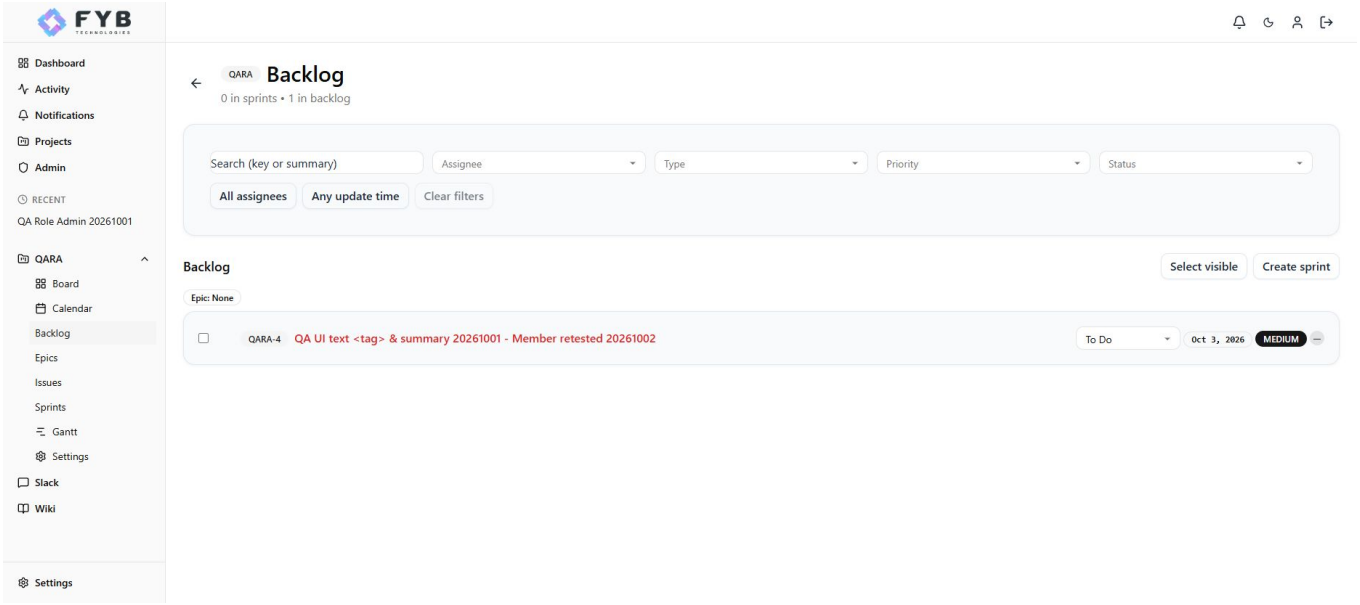

Point-in-time evidence. Expected/actual behavior and limitations are recorded in the matching check.

E05 / O020 - Completion toast with stale1/0 and empty backlog.

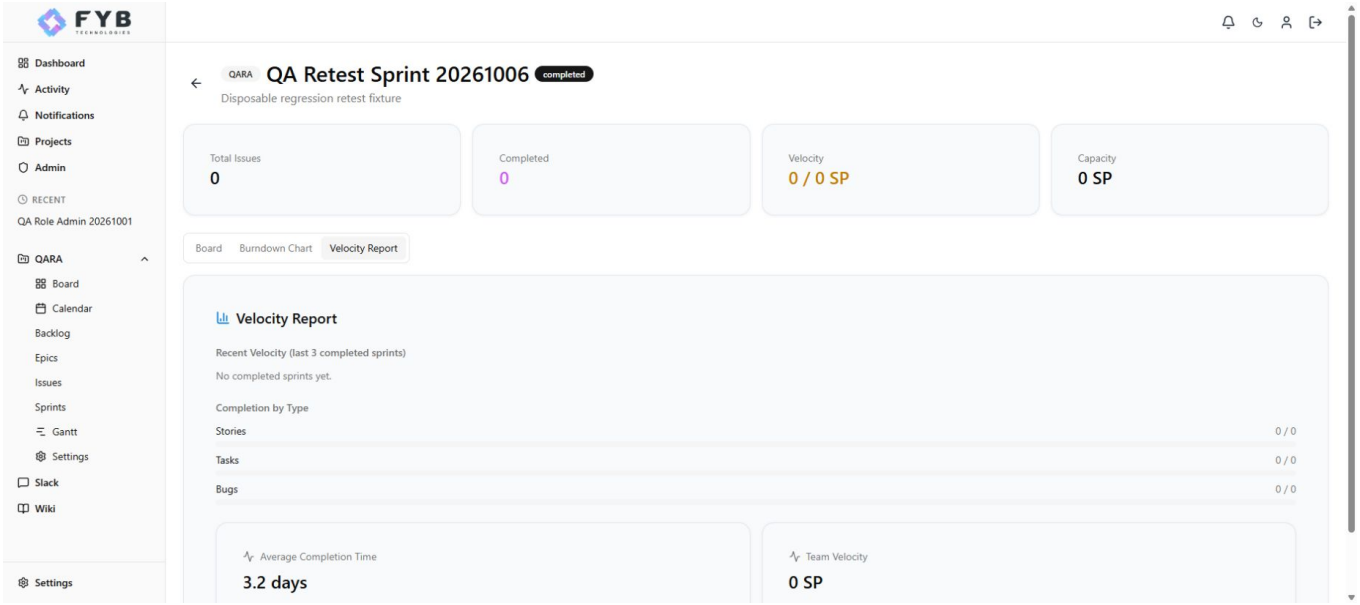

Point-in-time evidence. Expected/actual behavior and limitations are recorded in the matching check.

E06 / O021 - Reloaded backlog0/1 includes QARA-4.

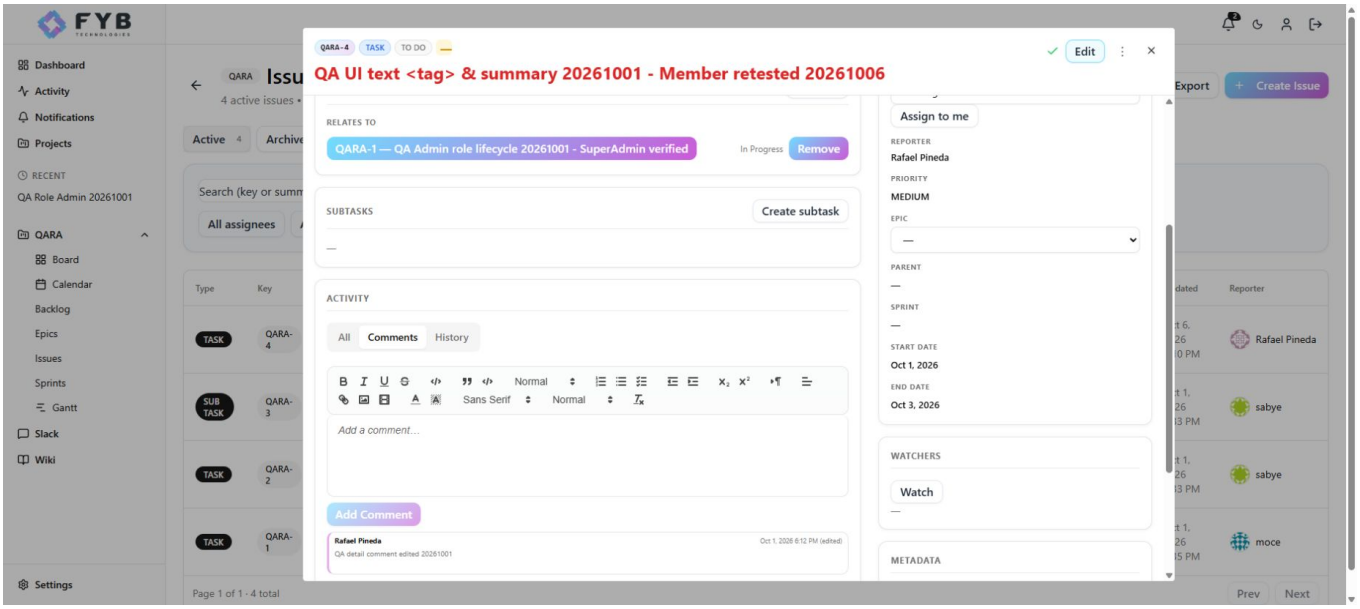

Point-in-time evidence. Expected/actual behavior and limitations are recorded in the matching check.

E07 / O022 - Contradictory completed-sprint report.

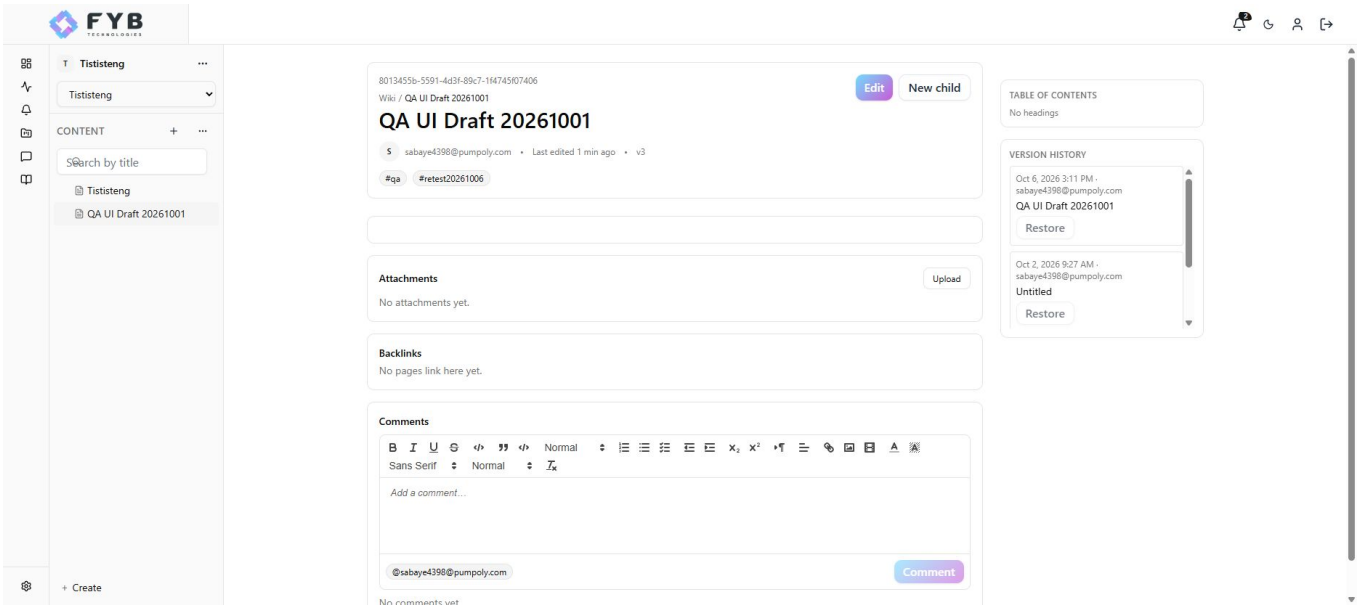

Point-in-time evidence. Expected/actual behavior and limitations are recorded in the matching check.

E08 / O034 - Member summary update saved.

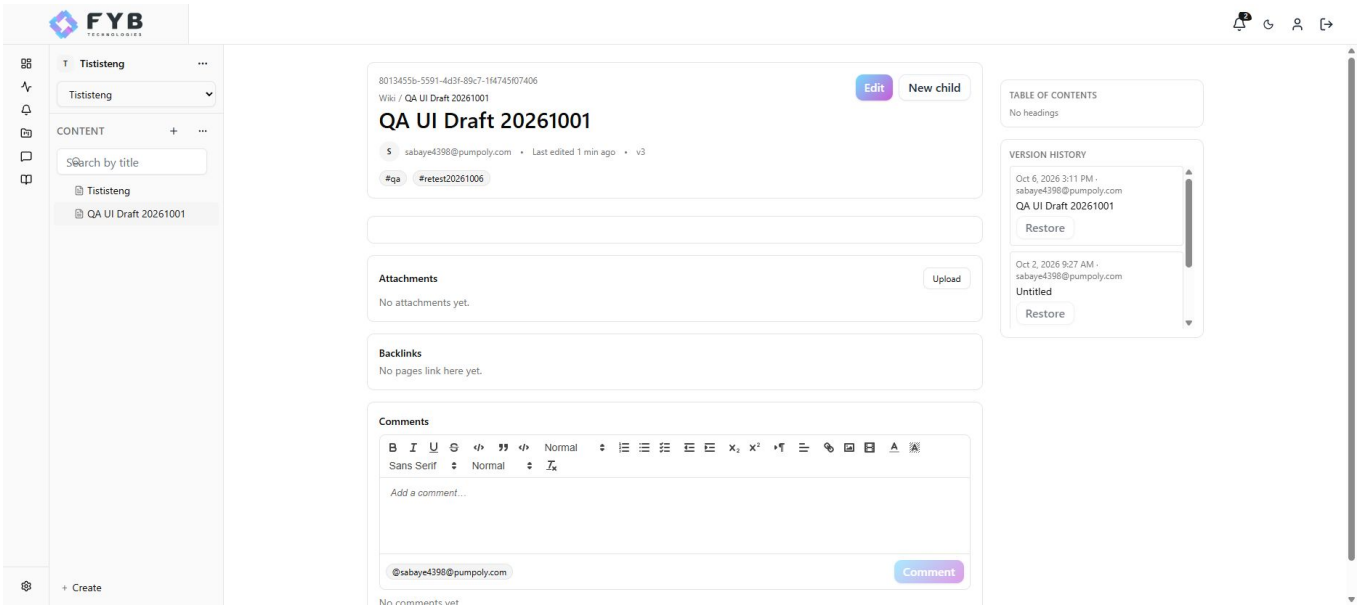

Point-in-time evidence. Expected/actual behavior and limitations are recorded in the matching check.

E09 / O036 - Saved Wiki author,tags/version.

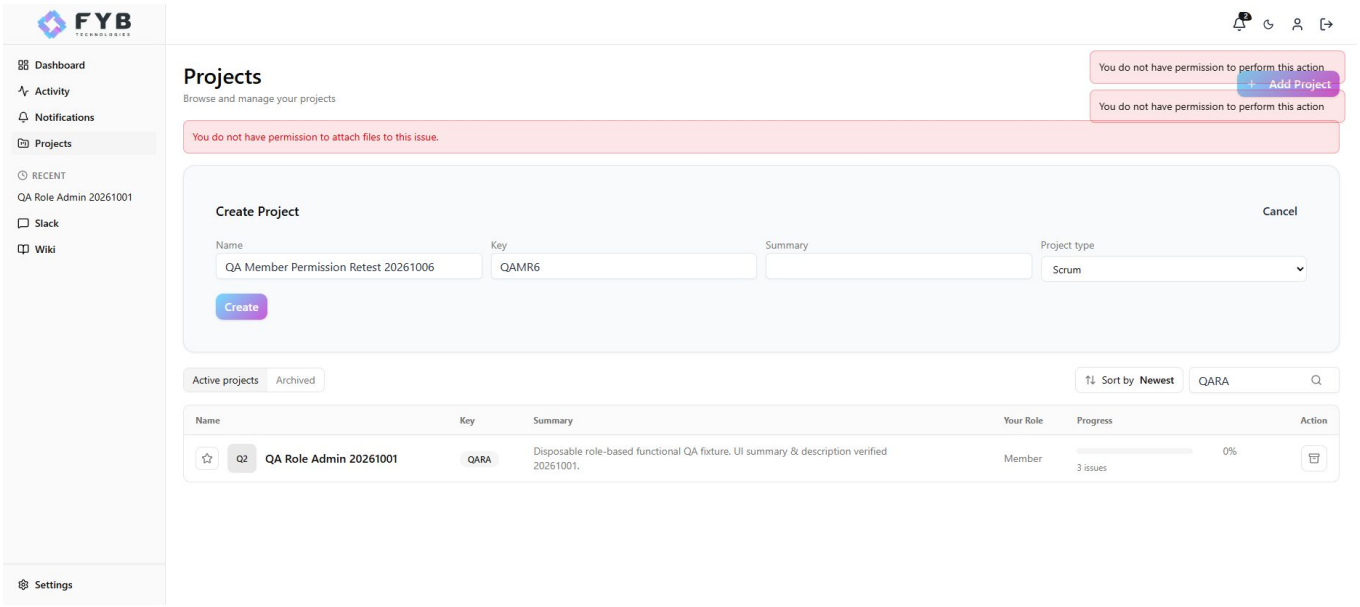

Point-in-time evidence. Expected/actual behavior and limitations are recorded in the matching check.

E10 / O037 - Cancel preserves saved metadata this time.

Point-in-time evidence. Expected/actual behavior and limitations are recorded in the matching check.

E11 / O039 - Wrong project denial text.

Point-in-time evidence. Expected/actual behavior and limitations are recorded in the matching check.
